- [11. Bonus Content \(Not Enough Time to Present\)](#)

1. Who am I?

- 1985-1995: **Open source software**, commercial DOS products
- 1996: Licensed data compression software for ***Age of Empires 1***
- 1997: First 3D video game: ***Montezuma's Return***
- 2000's: Years in trenches: Microsoft, Valve, Intel, SpaceX.
Products I worked on: ***World Series Baseball, Age of Empires, Halo Wars 1, Portal 2, CS:GO, Dota 2, Starlink.***
- 2015: CTO of **Boss Fight Entertainment**, acquired by Netflix
- 2020's: Open source texture/image **compression** library software
- 2023: **Public UAP dataset/search engine**, at **Sol Conference**

Released the open source “ufo_data” repo and <https://ufo-search.com/>

- https://github.com/richgel999/ufo_data
- **55,000+ records**, in a **simple standardized JSON textual format**, along with the C/C++ software that creates it.
- Numerous French/English event chronologies, OpenAI translated
- Various UFO/Forcean sighting collections and databases.
- **“Damned” Forcean data** from Frank Scully, George M. Eberhart, LeRoy Pea, Dr. Donald Johnson, Fred Keziah, Dr. Jacques Vallée, NICAP, Larry Hatch, Jérôme Beau, Godelieve Van Overmeire, Richard Dolan, and anonymous contributors.
- **All data from each source kept in separate files for IP/copyright purposes.**

Overall Impression of the 40's-50's (1)

- True history of radar has been suppressed/classified. Dr. Donald Menzel involved during WW2.
- Stanton Friedman (physicist) was right: “radar, rockets, nukes” connection.
- Dr. James E. McDonald (atmospheric physicist) was right: New “1947 Wave” corroborative data found via freshly digitized public database analysis.
- Summer 1947-1950's: All hell breaks loose. Huge UAP related events witnessed across nearly the entire US, Canada/Mexico. Vatican involved in “containment”. (New info found: [Cardinal Spellman met Truman, knew McIntyre. See Majestic docs.](#))

Overall Impression of the 40's-50's (2)

- Summer 1947: Local NM newspapers: **Strange activity reported near White Sands, NM. Metals fell.**
- **Late 40's/50's: Cat and mouse game between pro vs. anti-disclosure forces. (Ongoing today. Disinfo op/info suppression continues. Scientists blabbing.)**
- A “**containment**” strategy used to suppress newspaper stories/photos and spread hoaxes. Nevertheless, much leaked from scientists, USAF, Naval Intel etc. **Containment weakening.**
- UAP's were both **intimidation** (6/1947, 3/1950 Farmington, 7/1952 DC, etc. - see **Dr. Brandenburg**) and also a kind of **intervention** (2/1954 Edwards AFB), *warning us about abusing nuclear tech and poisoning the planet with h-bomb testing.* Many warnings in encounters.
- **Project Sign/Grudge/Blue Book's records are non-sensical, contradictory, silly. Ridiculous, obsolete bunk.**

Timeline of Events: WW2-Now (Not to Scale)

1/1948: Mantell
dies chasing saucer

7-8/1952: DC Overflown,
UAP Shot At/Fragments,
Astronomical Transients

WW2:
Secret Radar Moon Bounce, Menzel
involved, a-bombs. BSRA org founded by Layne.

1946: First photo from space. **Radar detects meteors, saucer warning.** BSRA gives Shaver-NHI retrievals & radar from NHI's.

Summer 1947: **Hell breaks loose. Large saucer wave.** More BSRA warnings, Roswell, censored photos, Maury Isl.

1950: Farmington, Univ. of Denver **Aztec lecture, AFOSI-Koehler interrogation tape, Scully book on 3 crashes with NHI's**

Late 1953: Unpublished/private Frank Scully informant notes: Saucer/NHI at Edwards AFB, US Gov. had secret meetings with US corps. over situation

Early 1954: Frank Edwards announces saucer captured. Many Edwards AFB saucer/occupant rumors in various private/unpublished archives. Gerald Light (BSRA) Edwards visit. Ex-Naval Intel notes. Edwards locked down.

2010: NH State Rep. Henry W. McElroy: **Eisenhower briefed and met with NHI.** Info likely from ex-intel officer with an expired NDA (Oscar Wayne Wolff aka "Agent Kewper"-LMH/Dolan interview.)

2024 – Controlled Disclosure.

You are Here.

Key resource: newspapers.com

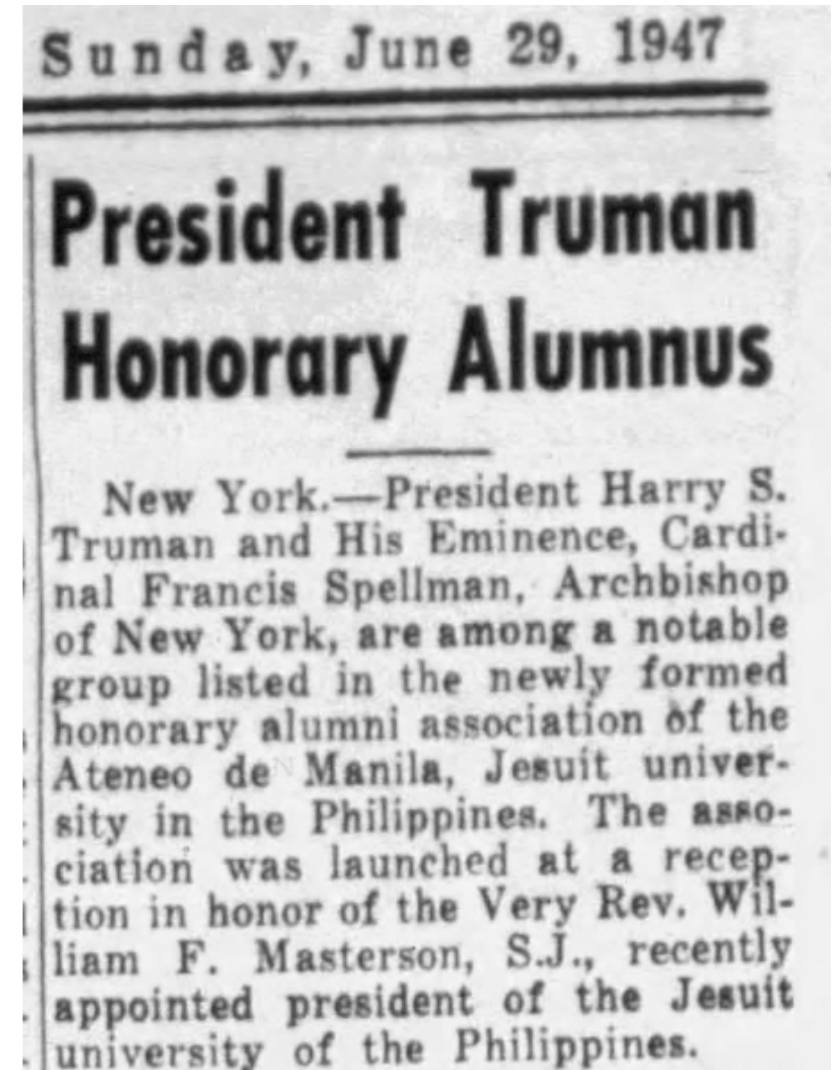

- Quoted phrases search engine hits:
 - **“flying saucer”: 708,415 matches (!)**
 - **“unidentified flying object”: 147,724 matches (!)**
 - **“flying disc”: 84,877 matches**
 - **“flying disk”: 16,769 matches**
- **Total: 957,785 hits!** Unmissable database signal.
- Doesn't include the common “UFO” acronym: newspapers.com doesn't like tiny acronyms (too many unrelated hits).
- **The local newspapers couldn't be reliably censored.**

Summer of 1947 “Containment” of “mass sightings”: Vatican involvement (Maj. Docs)

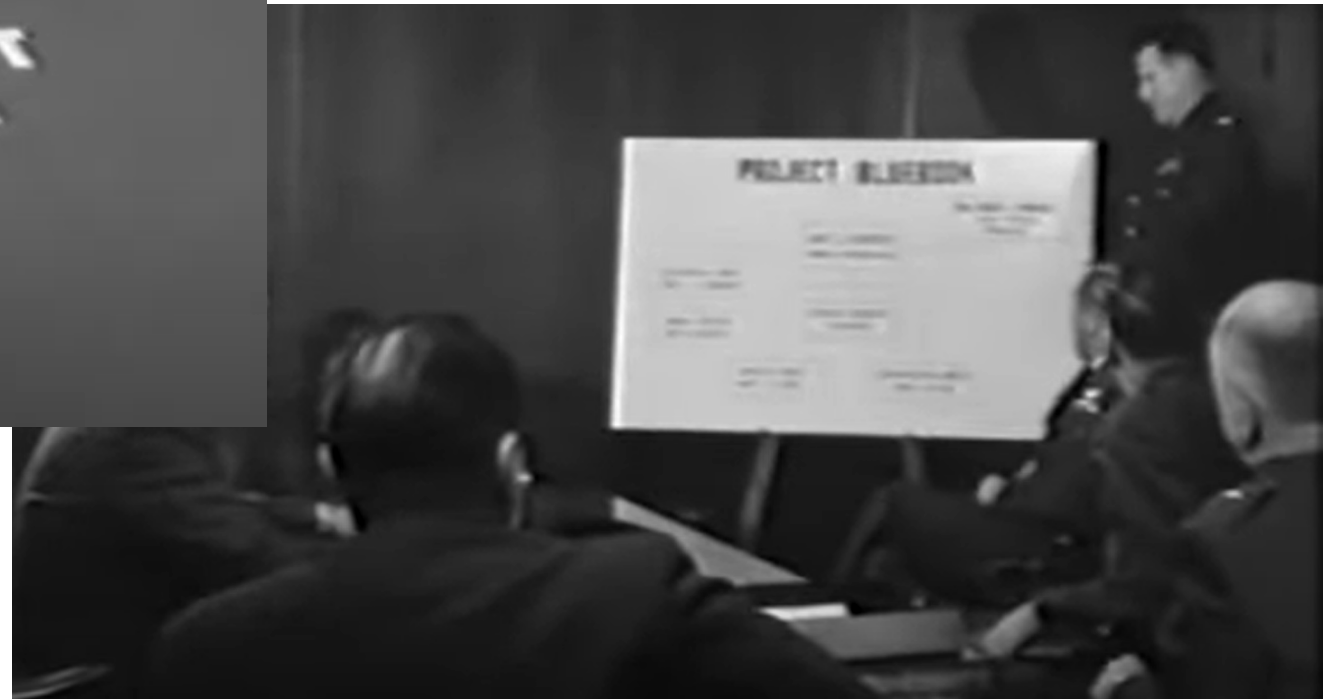

15. At the request of Panel member Cardinal Francis Spellman, met with the President to discuss the containment within the Catholic Church and its hierarchy of religious speculation if mass sightings occur. Such containment was successful during the 1947 sightings when Cardinal Spellman met with the Secretary of War on 29 June. The President has been briefed on Defense Plan 4P, which was written in part by the Panel member.

Newspaper clipping confirmation of Vatican involvement

- **June 29, 1947:** President Truman and Cardinal Francis Spellman accept honorary diploma in person
- See *The Nebraska Register*, Sun., Jun. 29, 1947, Page 4, <https://shorturl.at/JBBVW>
- ~5 days after Arnold formation sighting on June 24, while nation being overflowed by UAP's
- [Another clipping: Spellman knew Bishop McIntyre](#) (of Edwards AFB 4/1954 fame).

2. Project Sign/Grudge/Blue Book Records

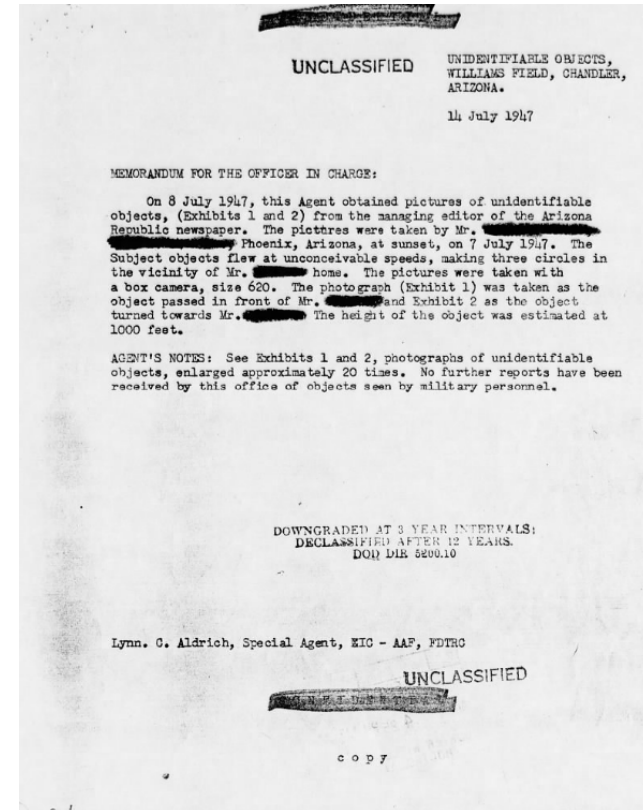

Stills from movie *Unidentified Flying Objects: The True Story of Flying Saucers* (1956)

CIC (Counter-Intelligence Corps) was Active During the Summer of 1947 Events

- On 7/7/1947, the day before Roswell, Phoenix AZ: Witness **William A. Rhodes** (1916-2007), an astronomer and inventor, takes UAP photos using a box camera, which are printed in the local papers.
- **Arnold and Palmer claimed the photos were censored. Turns out a CIC agent (and/or FBI) did go to the paper and get the photos.**
- See official Blue Book records:

<https://shorturl.at/c4oQO>

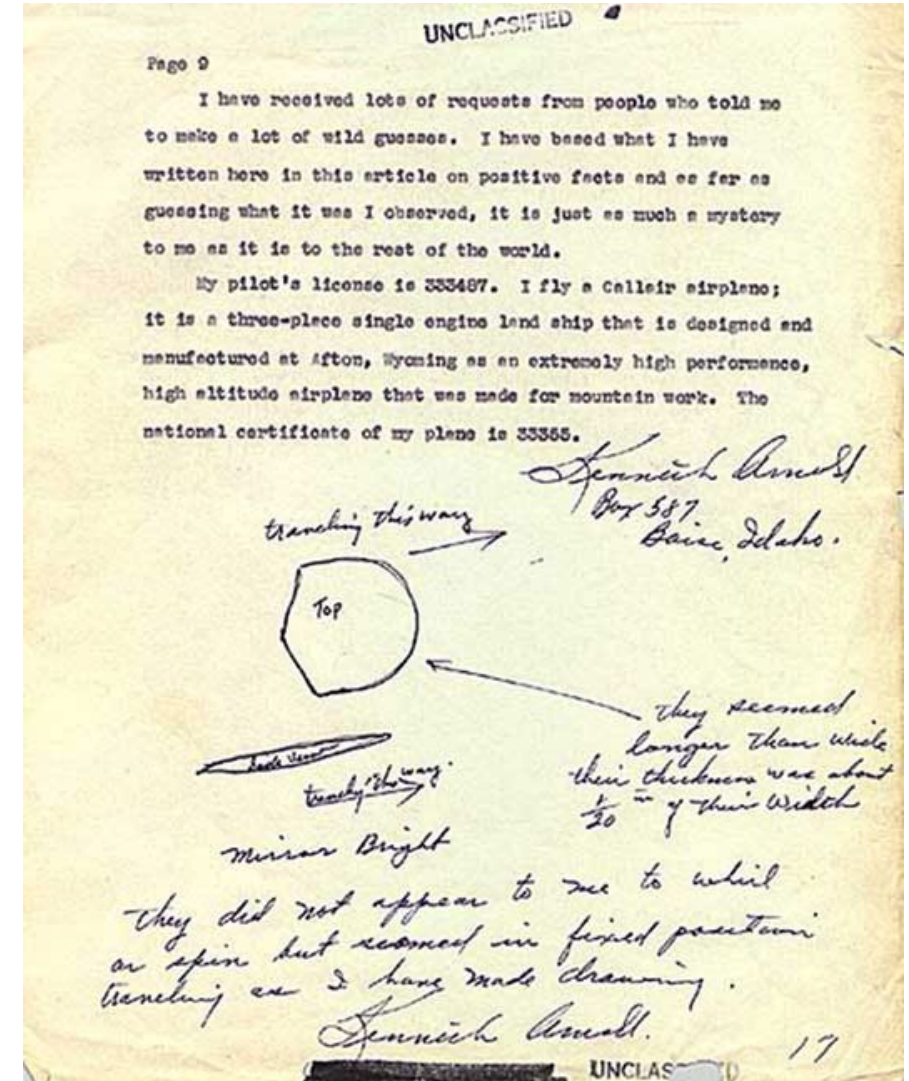

Suppressed Photos

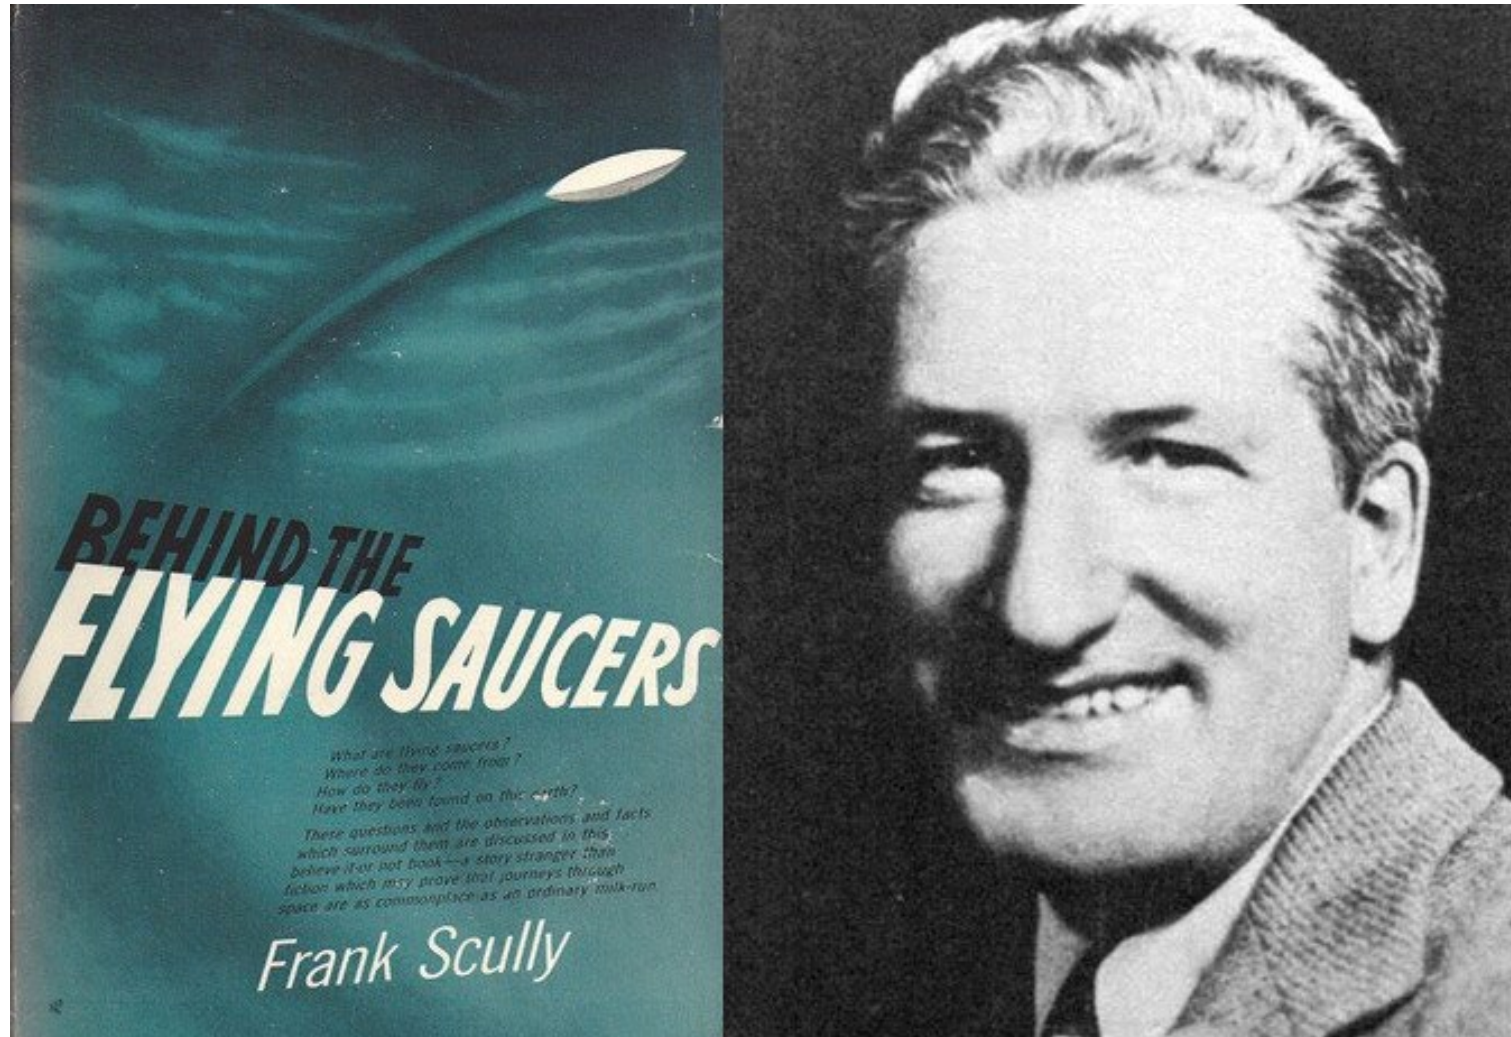

- This is what they didn't want printed in the nation's newspapers. Why?
- Only printed on **the day after Roswell**, in the *Arizona Republic*, Phoenix, Arizona, Wed., Jul. 9, 1947, Page 1
- See <https://shorturl.at/2pX9s>
- Authorities heavily investigated William A. Rhodes – see *Project Sign* records. Clean record.
- Minutes before: A mass sighting (80+ people) in Phoenix of "2 large silver orbs".

Left: Suppressed/Censored Rhodes Photo. Right: Kenneth Arnold's sighting report.

3. Frank Scully's Archive

Frank Scully's Archive

- Tracked down author/journalist **Frank Scully's archive** to the **American Heritage Center (AHC - University of Wyoming)**.
- Scully authored ***Behind the Flying Saucers* (1950)**: the **first blockbuster book on crash retrievals (C/R's)**
- **Book supposedly debunked, now forgotten. I'm taking a 2nd look.**
- Arranged for AHC researchers to digitize his archive for 1st time. Archive is uploaded here: <https://shorturl.at/xQvc9>
- We found recordings of then-famous **March 1950 University of Denver Lecture on the Aztec C/R**, and **George Koehler's secret AFOSI interrogation tape** ("Item #17"). Listen: <https://shorturl.at/V9Fst>
- **Archive is public here: shorturl.at/vvksv**

Who was Francis Joseph Xavier Scully (1892-1964)?

- **Educated at Columbia University**, worked at ***New York Sun, Variety, 20th Century Fox.***
- Helped **Grand Duke Alexander of Russia** (advisor to Emperor Nicholas II) write life story.
- 1957: Pope Pius XII Knighted Scully (**Order of St. Gregory**). (*Grusch: Vatican was/is involved.*)
- **Passed away nearby in Palm Springs CA.**
- Wife Alice (left in photo) **donated his archive to the American Heritage Center in 1988.** Photo from *Desert Sun*, Volume XXX, Number 144, 13 March 1957 (<https://shorturl.at/cQt6s>)

Behind the Flying Saucers (1950)

- First crash retrieval book. 1950 blockbuster **described at least 3 – not just Aztec NM (1948).**
- Had **8 scientist informants: “Dr. Gee was a composite of 8 different scientists, whose stories were tape recorded and then synthesized by me where they were in substantial agreement.”**
- Archive shows at least one was at **Wright-Patterson AFB, another at Lockheed. Scully never published this information.**
- Archive **contains many hours of wire and tape recordings.**
- **Found legal release forms** for a planned movie for these 8 scientists.
- Wrote that **saucers may use a form of magnetic propulsion.**
- **Dr. Robert Sarbacher (US R&D Board, Einstein student) supported Scully’s book**

Scully's book debunked, supposedly

- Debunkers claim: Scully was exclusively receiving info *only* from 2 individuals: **Silas Newton and Leo GeBauer**.
- Press **hit piece** in 1952.
- **They tried to buy off Scully right before** with a cash payoff. **Scully refused.** (Details in his archive.)
- **Newton/GeBauer “lawfared”** in 1953. (IMO: They were used.)
- Scully's wire recordings, still undigitized, may contain their interviews.
- **Scully's book did NOT refer to only 1 crash at Aztec**, but several. **One is similar to Roswell.**
- **Dr. Sarbacher (Einstein Student, US R&D Board) and Stringfield supported his book.**

Scully's unpublished notes: **“One of Dr. G’s men, assigned to right field [sic]...” “Will talk privately with what’s going on saucer-wise at Lockheed.”**

Feb. 10 One of Dr. G's men, assigned to right field, was ordered to report to the Pentagon pronto. Head of the Air Force research quizzed him for hours on all he knew about the Aztec flying saucers and at the end of the interview told him to forget all he had said or heard.

Feb. 15 Robert Imanidt, photographer at Lockheed, whose address 1213 West Avenue 37, L.A. 31 'phone CApital 8311. Will talk privately with what's going on saucer-wise at Lockheed.

2008: Scully Related Files are **Still Classified**

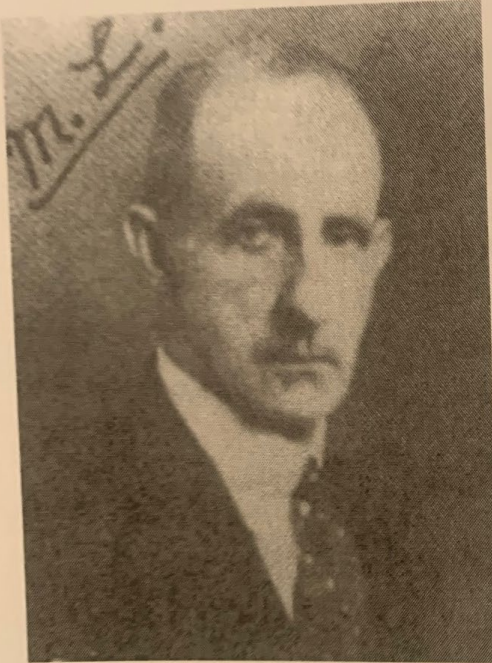

- Below: **Author Nick Redfern** tried to use **FOIA requests** to pry out official files related to the Aztec crash
- Redfern states in the 2008 re-release of *Behind the Flying Saucers* that **some files (about Leo GeBauer) are still classified**
- *So, why would files about a supposed hoax be still classified?*

“The FBI released to me,” Redfern said, “200 pages of a file that in itself is at least 400 pages in length, and at least half of which the FBI to this day will not declassify. And parts of that file are still classified in the name of national security 60 years later. Which is kind of surprising and often opens a lot of people’s eyes. The idea that if this was a straightforward hoax, why doesn’t

4. BSRA Archive – Located at the Archives for the Unexplained (AFU) in Sweden

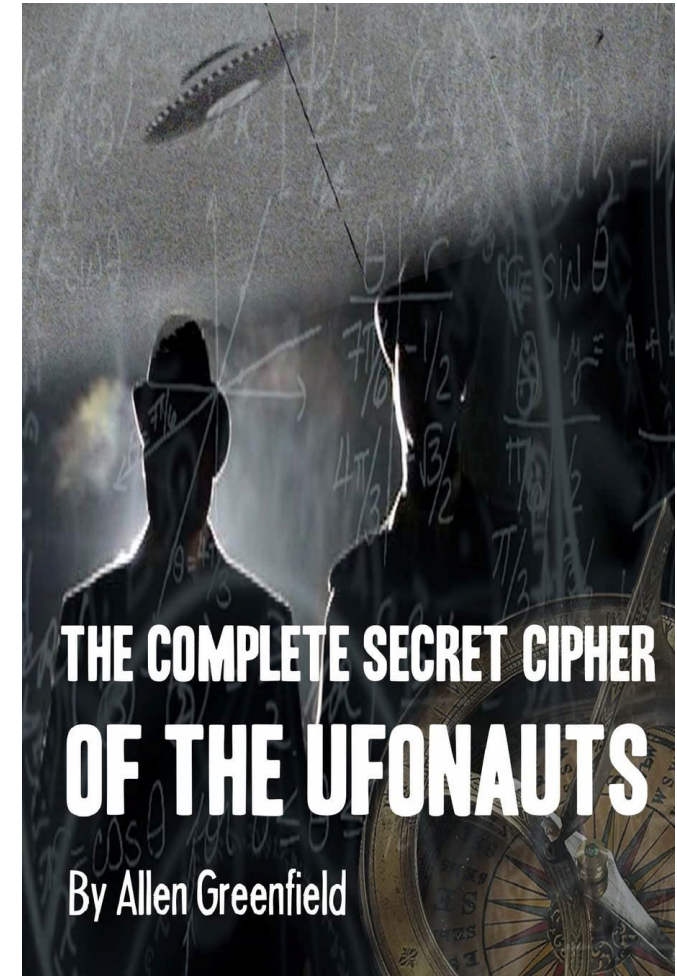

BSRA Founder Meade Layne: Key early figure

Layne, Meade, founder of the venerable Borderland Sciences Research Foundation. Layne was for many years the editor of BSRF's *Round Robin* and other journals, and he worked closely with trance channeler Mark Probert. Layne was also a student of the work of Frater Achad. At one time, Layne had been a member of the Society of the Inner Light, a direct offspring of the Hermetic Order of the Golden Dawn. At the end of the 19th century, this Society developed its rituals from certain Rosicrucian cipher manuscripts based in the teachings of the Third Order, or Secret Chiefs, or Ascended Masters — which are identical with the Space People in contact lore. That so much cipher material shows up in

and around Layne, who was said to be in frequent communication with the Great White Brotherhood, is highly suggestive that he was one of those who introduced the cipher into UFO trance-channeled contactee lore. Layne was also writing about flying discs before Kenneth Arnold's sightings. He also introduced the idea of channeled masters to UFOlogy.

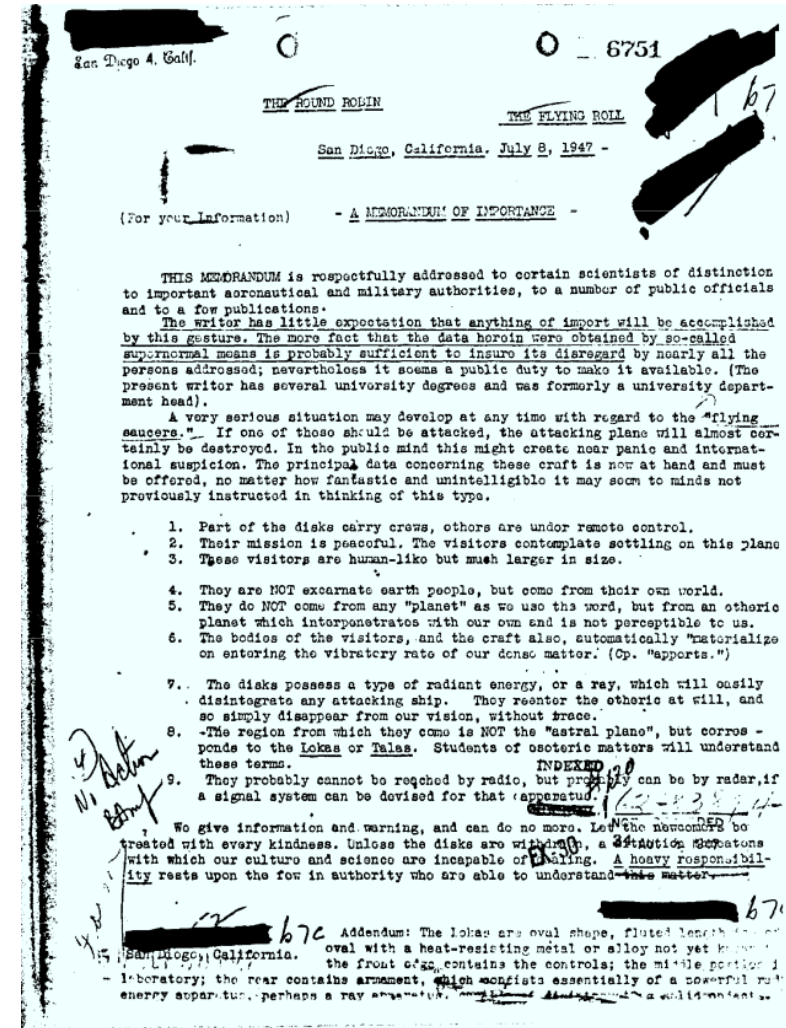

What *really* was the BSRA? Psychic spies.

- Begun in 1945 by **Meade Layne** (1882-1961): “not a scientist or mathematician”, but “an academician who.. strayed into **borderland sciences and psychic research.**”
- “We want to print short articles, data, items of various kinds supplied by our “members” ... and perhaps a few notes of, each time, of the **Fortean** variety...”
- **Sci-fi authors, “mediums” or “channelers”, and remote viewers**
- Meade Layne was patriotic, **forwarded key info to the US Gov./US Mil.**
- **Started receiving UFO reports in Oct. 1946**, sent to newspapers.
- ***BSRA knew the saucers were coming; warned the public in 10/1946.***

Some of BSRA's "Memorandum of Importance" are in official FBI vault files

- This one dated **July 8, 1947** – the **same day as Roswell**
- See <https://vault.fbi.gov/UFO/UFO%20Part%201%20of%2016>
- Or <https://shorturl.at/Hadg9>
- Their associates were doing their best to figure out what was happening - Meade was compiling and forwarding it along

Jackpot: BSRA's Secret Internal 1950 Mailing List: A Who's Who of US Gov./Mil/etc. Figures

Key List July 4, 1950

Washington

Rear Adm. AC. Don
Dir. Joint Staff
Washington

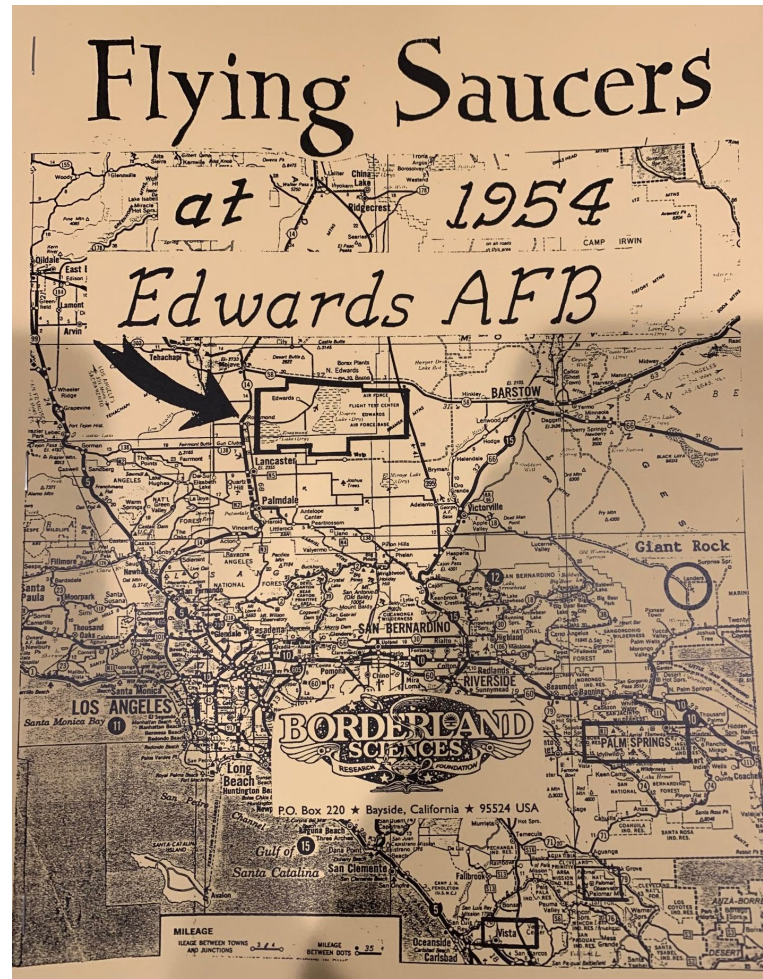

Jackpot: In 1950 BSRA Was Sending Info to **USAF Gen. Nathan F. Twining**

- **MJ-12 member**
- Last address on their internal 1950 mailing list
- Looks like the “**Working Group**” (Lt. Col. Corso – *The Day After Roswell*) was receiving info from the most talented organized group of mediums/psychics on Earth.

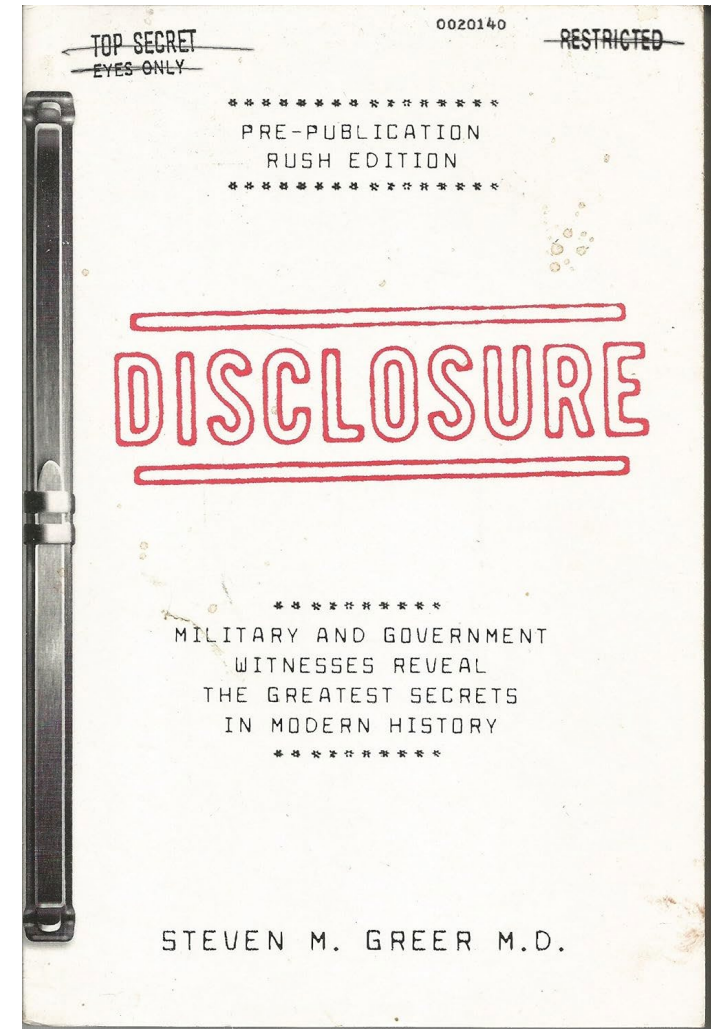

Lt. Gen. Nathan Twining
Commander, Armed Forces in Alaska
c/o Elmendorf Air Force Base
Anchorage, Alaska

BSRA also Issued Some Special Reports

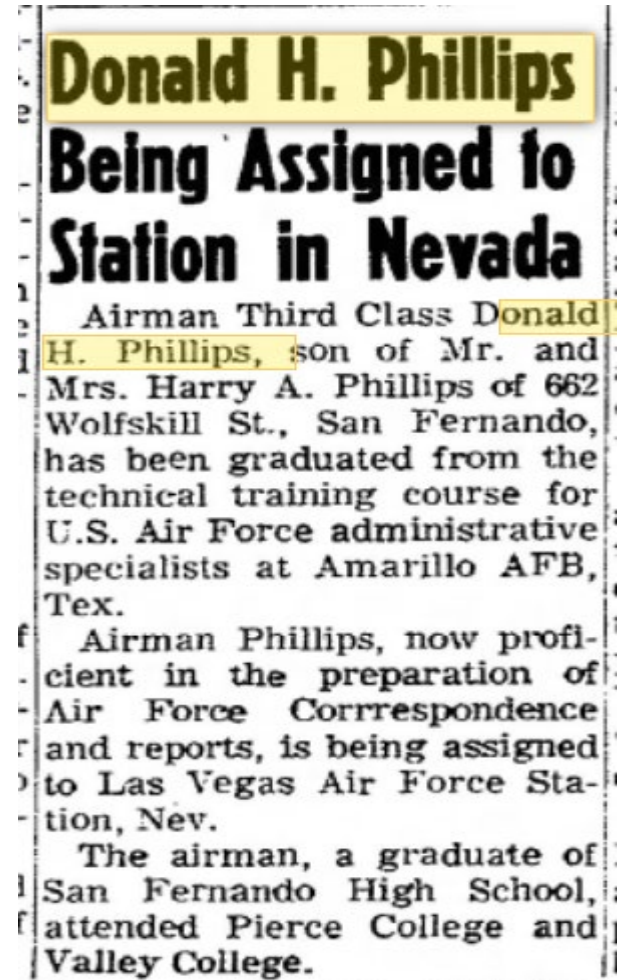

5. Whistleblower Background Checking

- Studied Greer's book ***Disclosure: Military and Government Witnesses Reveal the Greatest Secrets in Modern History*** (2001).
- Searched book for witnesses with **verifiable mil/intel/aerospace/etc. backgrounds**
- Two stood out: **Donald Phillips (Ex-USA/CIA/Lockheed Skunkworks)** and **William G. Uhouse (USMC, Korean War vet, secret aviation projects)**.

Key Whistleblower: *Disclosure Project* Witness Don Phillips

- Donald H. Phillips, USAF: Assigned to Las Vegas Air Force Station, NV in 1965
- See *Valley News*, Van Nuys CA, Thu., Jul. 29, 1965, Page 7
 - <https://shorturl.at/9Gu4Z>

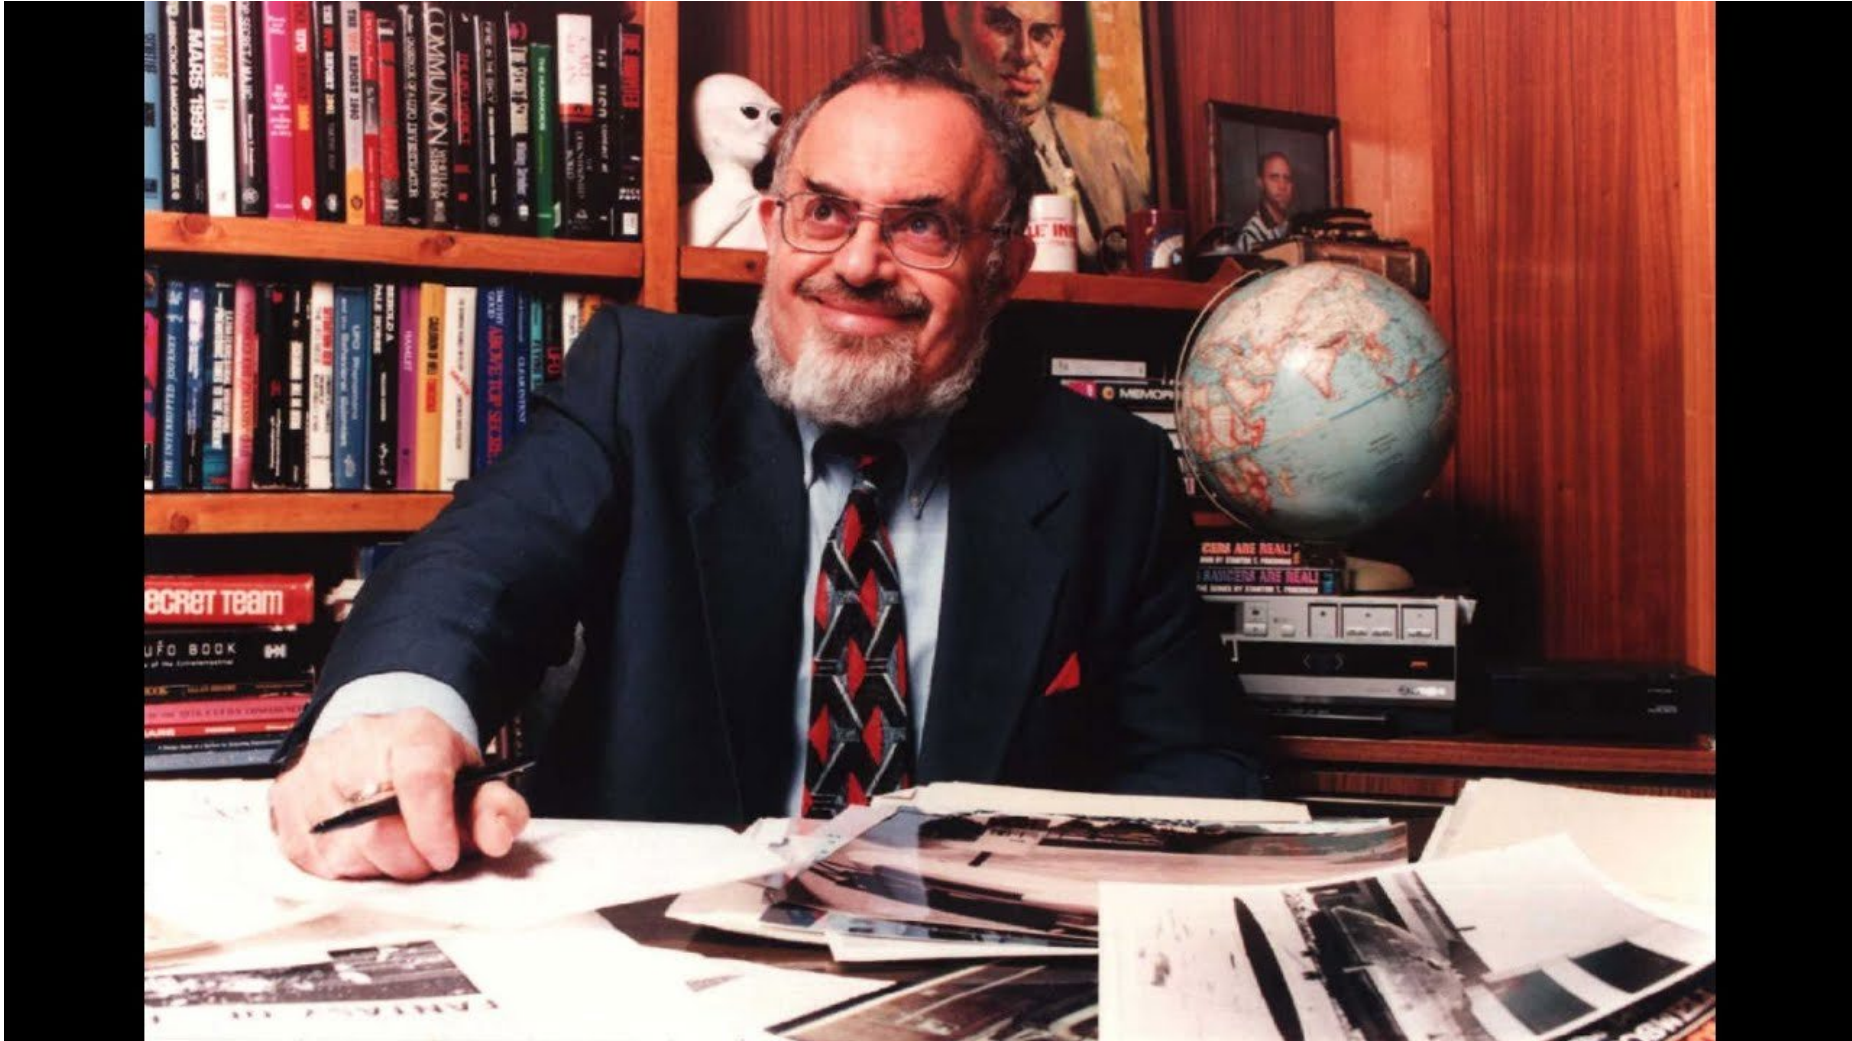

What did Don Phillips claim? A meeting with NHI's in California.

- Quote from Don Phillips
- See video interviews
- What's up with Edwards AFB in 1954?

We have records from 1954 that were meetings between our own leaders of this country and ET's here in California. And, as I understand it from the written documentation, we were asked if we would allow them to be here and do research. I have read that our reply was, well, how can we stop you? You are so advanced. And I will say by this camera and this sound, that it was President Eisenhower that had this meeting. And it was on film, sort of like what we are doing now. Bringing it up to date, the NATO report gave that there were 12 races. To make a final summary, they had to have contacts to go to these races in order to understand who they are, what they are doing, and what they could do. And the report didn't get into the context, but it certainly did verify that they haven't been here for just a few years, but rather hundreds maybe thousands of years. And, this is written in the text.

6. Stanton Friedman Was Right: “Radar, Rockets, Nukes”. Turns out radar’s true history is fuzzy.

Key 1940's Developments: Radar, Rockets, Nukes (Friedman) – and Digital Computers

- WW2, early-mid 40's: **Still secret radar bounces off the Moon**
- 6/1944: V-2 reaches space (same say during the war)
- 7/1945, 8/1945: Trinity explosion, Japan a-bomb attacks
- 12/1945: ENIAC Electronic Computer announced (my addition)
- 6-7/1946: *Able* and *Baker* a-bomb tests (*Operation Crossroads*)
- 10/1946: **Radar first used to detect meteors** (Giacobini-Zinner)
 - Coincidentally: **Many west coast UAP sightings reported to BSRA** during this same shower – ***BSRA said in newspapers UAP's would return within ~1 year*** (“Kareeta”)
- 10/1946: First photo taken from space
- 6-7/1947: **All hell breaks loose** over CONUS, Canada, Mexico, etc.

Radar Signals Bounced off the Moon During WW2 in “Absolute Secrecy”

- **Dr. Oliver J. Lee** (1881-1964), **Dearborn Observatory** (Northwestern University), said on July 6, 1947 in newspapers that the discs might represent the same sort of thing as sending radar signals to the Moon, “**one of the greatest technological achievements of the war and accomplished in absolute secrecy.**” (See <https://shorturl.at/W6n7l>)
- Huh? The official Moon bounce date is January 10, 1946 (*Project Diana*) – *notice right after the war.* (**Something’s up.**)
- Turns out debunker **Dr. Donald Menzel** made the initial calculations on how to do this in 1941 (!).
- **Was Menzel involved in this secret work?** I would not be surprised.

- **Stanton Friedman said radar was crucial to understanding UFO's. He was right.**
- *Palladium-Item*, Richmond, Indiana, Sun., Jul. 6, 1947, Page 1. See <https://shorturl.at/W6n7I>
- Very important piece of info IMO
- This means **very powerful radar pulses were sent into space and bounced off the Moon in absolute secrecy – before *Trinity***
- **Dr. Donald Menzel (uber UFO debunker, led a very secret classified life according to Stanton Friedman's research, of *Menzel Gap* and MJ-12 infamy), did the calculations for this bounce in 1941**

try, Starr declared.

"Man Made"

Two Chicago astronomers said the discs are probably "man-made." The undulating, flashing objects "could not be meteors," said Dr. Girard Kiuper, director of the University of Chicago's Yerkes observatory at Williams Bay, Wis.

"We realize," said Dr. Oliver Lee, director of Northwestern university's Dearborn observatory, "that the army and navy are working on all sorts of things we know nothing about."

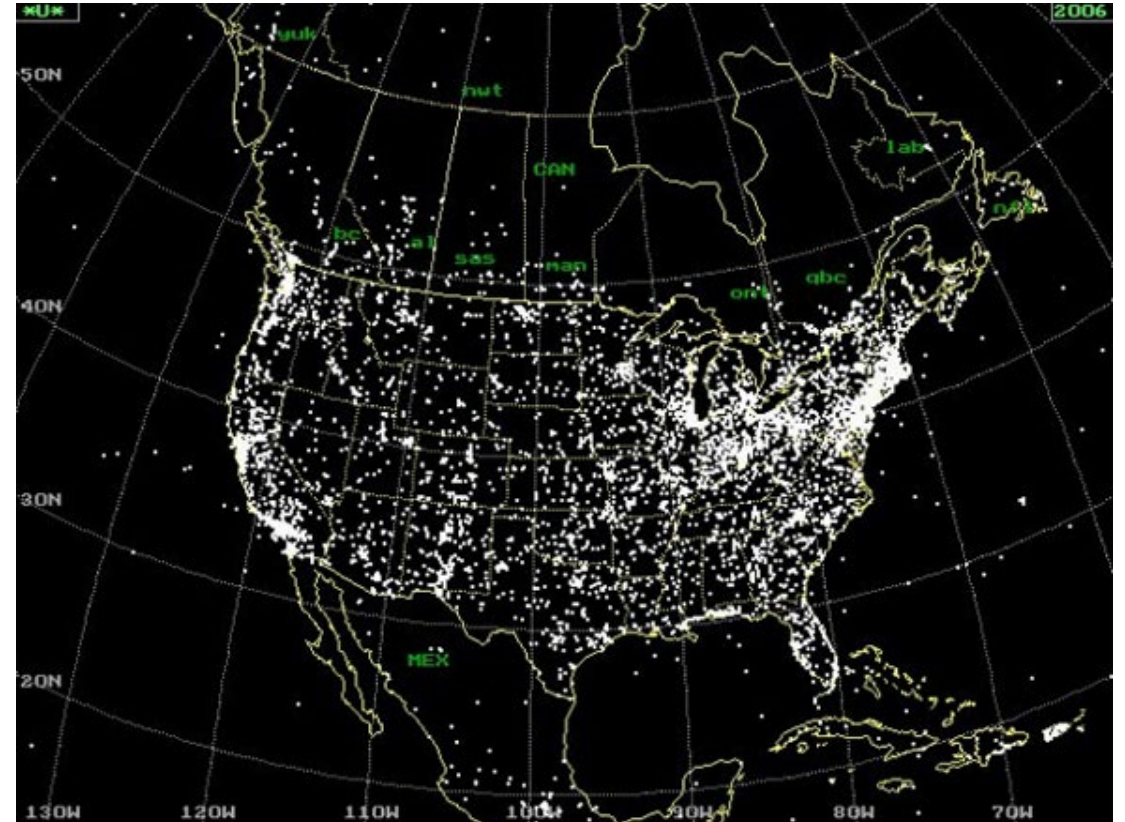

Lee said the discs might represent the same sort of thing as sending radar signals to the moon. "one of the greatest technological achievements of the war and accomplished in absolute secrecy."

The unnamed scientist quoted by The Los Angeles Herald and Express said, according to the paper, that "these so-called saucers are capable of high speeds but can be controlled from the ground. They are 20 feet in width in the center and are partially rocket propelled on the takeoff."

7. Sighting Databases: A Case of Missing Data

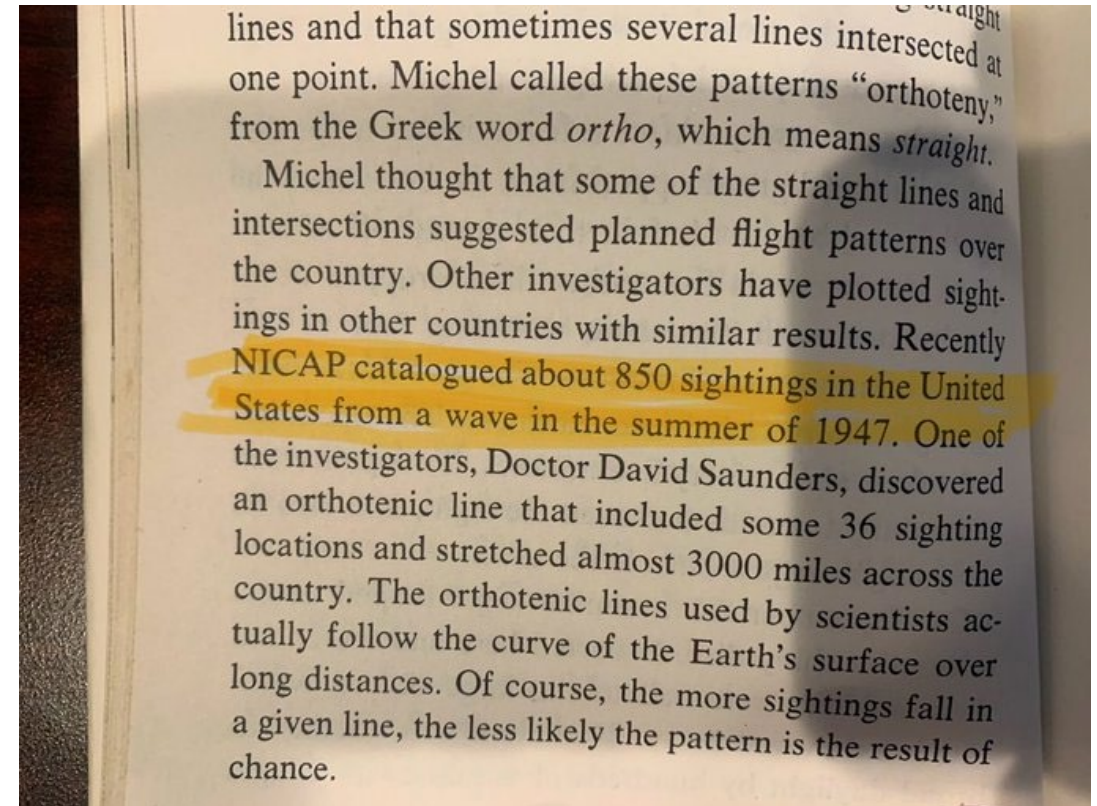

Left: Larry Hatch - Programmer, UDB Database
Right: Hatch's DOS database viewer product

UFO/UAP Datasets: There is missing data

- In the book *Investigating UFO's* by Kettelkamp, page 48, it says **NICAP catalogued 850 sightings just for the summer of 1947.**
- So how many NICAP sighting records have I found for the entirety of 1947 on the web? **Only 101.**
- **Strange - something is wrong.**

UFO/UAP Datasets: There is missing data

- Left graph is from SCU's recent paper *UAP Activity Pattern Study 1945–1975 Military and Public Activities*
- **Notice the # of NICAP incidents in this graph for 1947 is around 100.**
- Key data is missing!

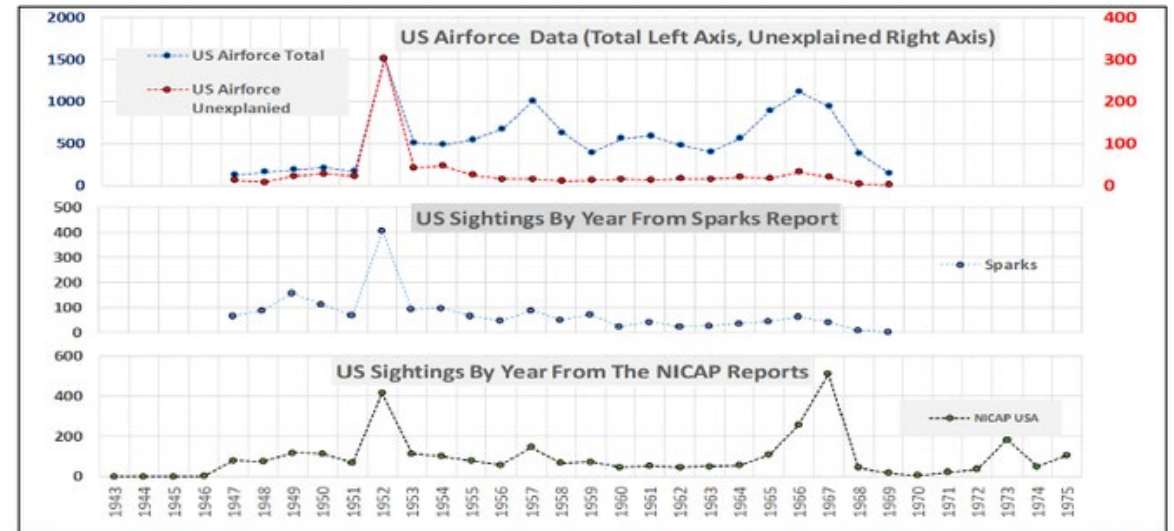

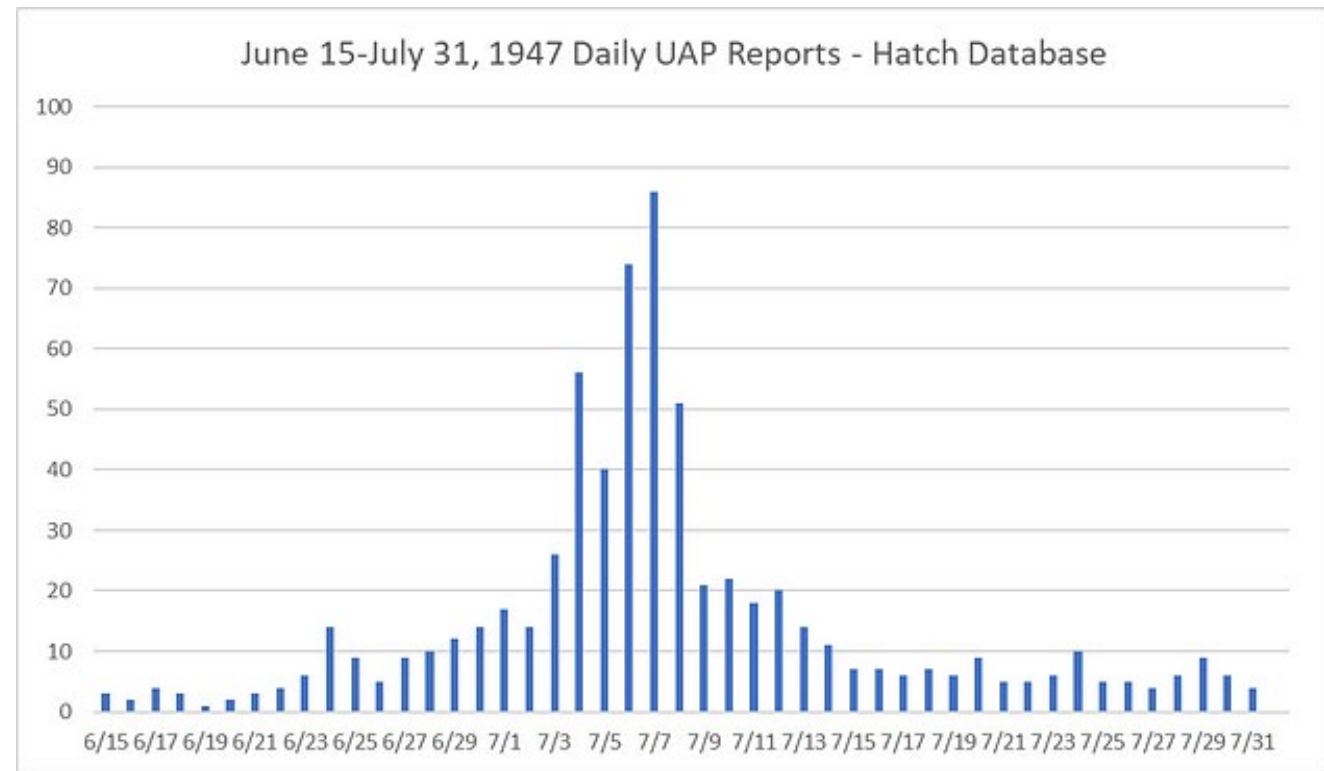

Figure 3-17. Number of incidents reported by U.S. Airforce, Sparks, and NICAP databases (1945 – 1975)

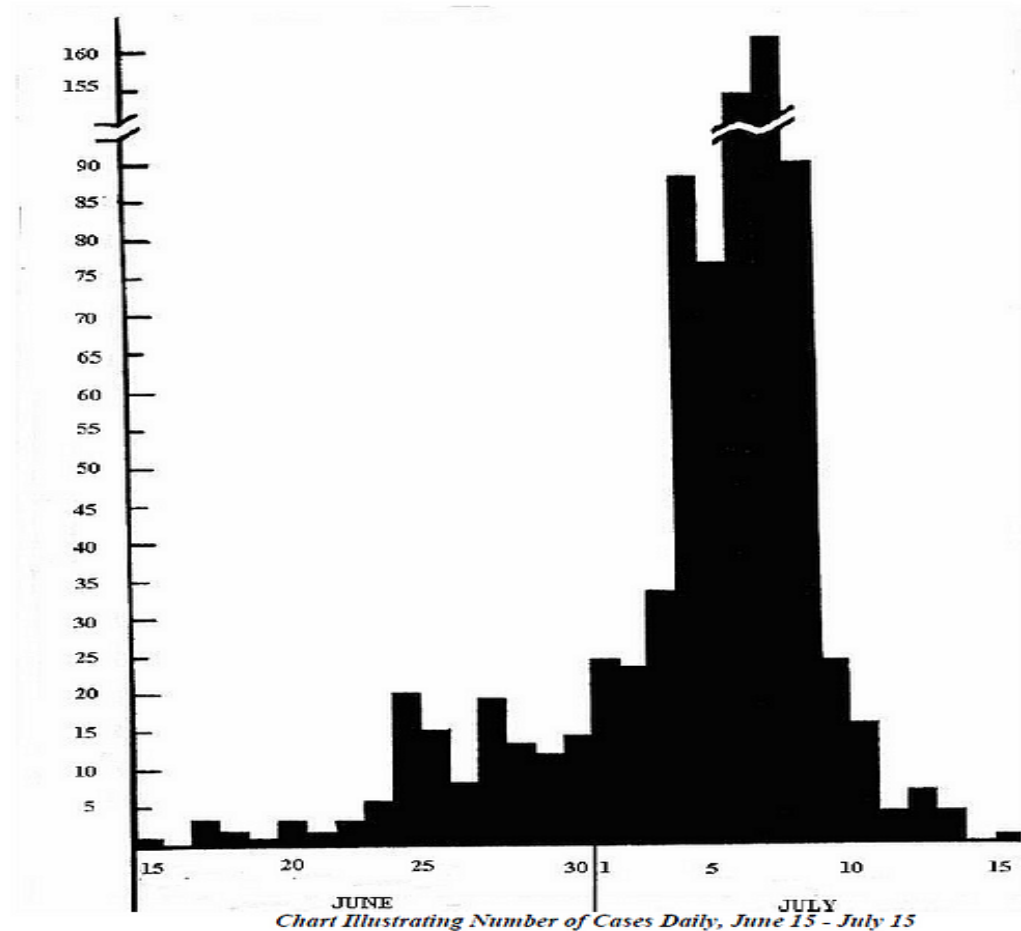

Larry Hatch's “udb” Sighting Dataset: June-July 1947

- The peak summer of 1947 day for sighting reports in this public dataset is **July 7, 1947**
- This is **the day before Roswell** (July 8, 1947)
- Was there WW2-style press censorship (“containment”) in 1947 after July 7?

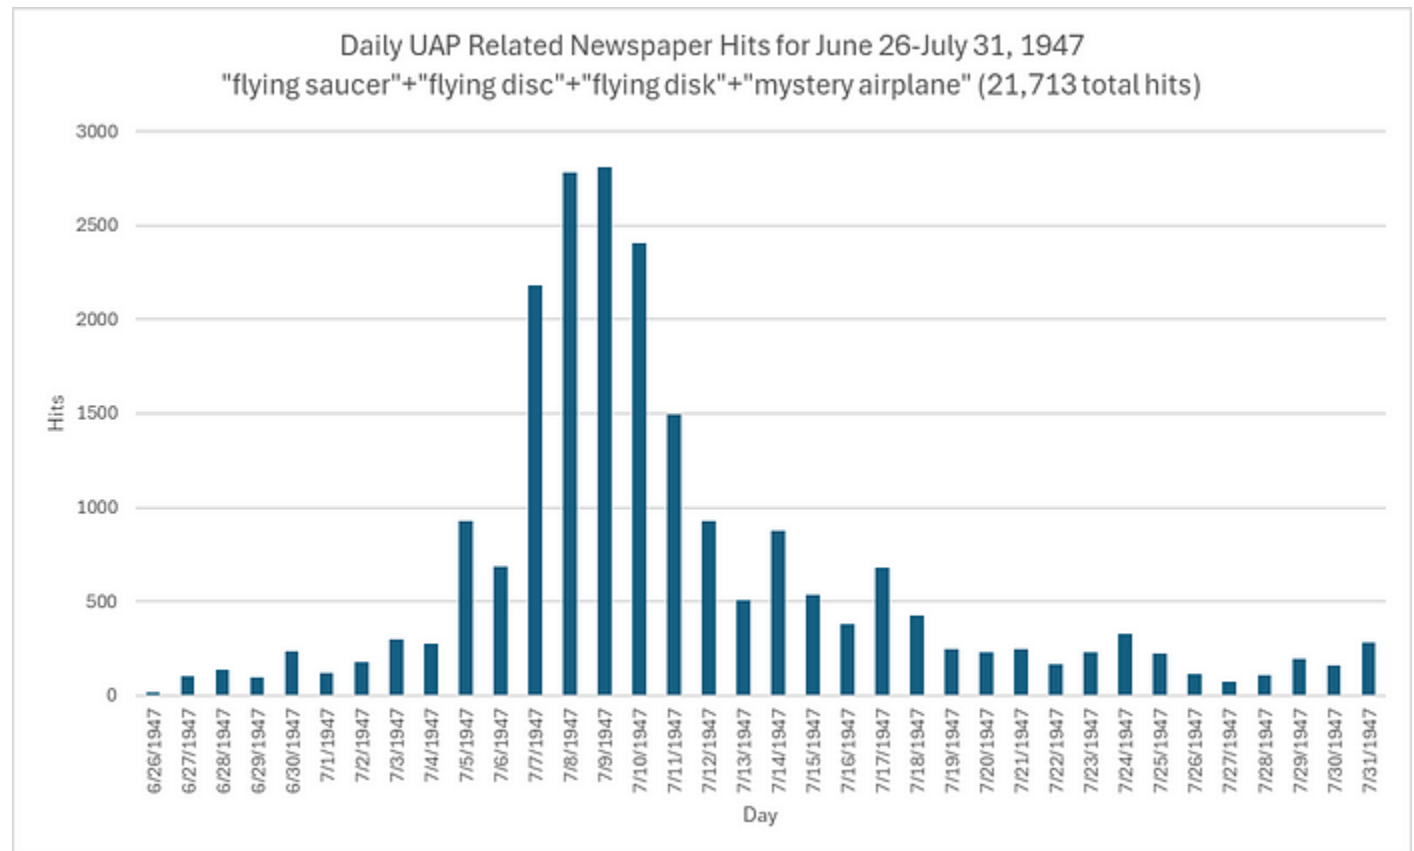

UFO/UAP Datasets: There is missing data

- From the paper *Report of the 1947 UFO Wave* by Ted Bloecher and **Dr. James E. McDonald** (Atmospheric Physicist) (1967).
- **Graph has ~160 reports for just a single day in July 1947**
- **Peak is July 7, 1947 – The day before Roswell**

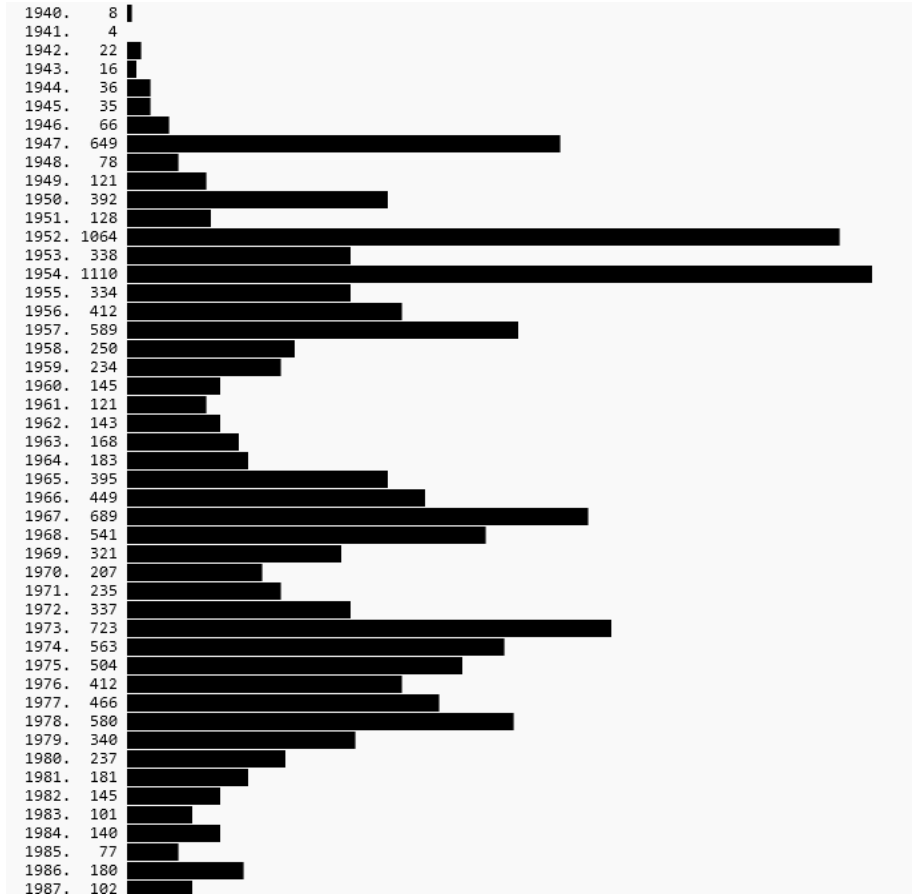

Newspapers.com database keyword hits for the summer of 1947 – Notice the spike

- **Peak: July 9, 1947 (Day After Roswell)**
- Nearly all are “flying saucer”, “flying disc” or “flying disk”
- **21,713 total hits just for 6/26/1947-7/31/1947**
- Many databases show a massive wave of reports for June-July 1947
- *Newspaper hits align with UFO databases, same peak days*

Worldwide Historical Trends – Hatch Dataset

- Significant years: 1947, 1950, 1952, 1954, 1957, 1966-1968, 1973, 1978, smaller peaks in 1986 and early 90's
- **All-time peaks: 1947/1952/1954**
- ~1960: Odd lull - coincidentally, **the USSR/US suspended nuclear tests between Nov. 1958 to Sept. 1961**
- The data falls off post early 2000's (partially because the **researchers died**)
- Some observations:
 - 1947: First large 20th century spike
 - 40's-50's: Classic saucers/flying discs
 - Late 60's spike: of underappreciated intensity
 - 70's/80's: **Mystery Helicopters**, mutilations
 - 90's/early 2000's: era of **large silent triangles**

8. Various Newspaper, Magazine Hits

Left: 7/7/1947, Right: 7/29/1952

See <https://shorturl.at/1WGna>, <https://shorturl.at/f3RAB>

Luder Valley: June 1946, Sci-fi short story printed in Palmer's *Amazing Stories* (shorturl.at/q0Jji)

- Amazing **pre-saucer era prototypical crash retrieval story**: the Germans find a crashed NHI spacecraft during WW2, US retrieves it.
- Sounds like David Grusch: Italians had craft, Vatican assisted, we retrieved it during WW2.
- Before they can retrieve it to help their war effort, an American counterintelligence (a “**T-Force**”) finds it too.
- Story: **If the craft fell into Nazi hands the war could be lost**:
 - “..was thinking of the whole future of science if I could get that ship intact into the hands of American authorities..”

1946 *Luder Valley* Story Concepts

- Pre-1947: Crash retrievals, T-Forces, secret R&D programs
- **Radar development was accelerated or developed from tech found in a crash retrieval (radar - again!)**
- 3D holograms, incredible tech, exotic materials
- The great powers intensely fighting over NHI technology/craft
- Secret aviation tech used by special forces years before public knows
- NHI occupants in suspended animation
- The tech being patented, civilians immensely profiting
- Retrieved tech changing the war's outcome, influencing science
- Shaver nailed it (see Grusch). How did he know?

Richard Shaver – 1940's Sci-Fi Author – 10/1946 Newspaper Hit

- Shaver (of the “Shaver Mystery”) was a brand created by publisher/editor Ray Palmer. In reality: a placeholder-some stories not his
- Ray Palmer is said to have heavily edited Shaver’s rough manuscripts to make them publishable.
- **Turns out *others “collaborated” with Shaver too.* See clipping on right.**
- ***Luder Valley* is not a typical “Shaver Mystery” story. Highly doubtful Shaver wrote this.**
- Right clip: *Pittsburgh Post-Gazette*, 10/3/1946, Page 8, shorturl.at/RJzrv

* * *

Handsome Bob Davis, the new doorman at the Mercur Music Bar, was a bouncer not so long ago at the Palladium, Hollywood's famous dance spot. He had quite a few screen tests out there, too, including one for the role of Marcellus in "The Robe" . . . The lead novellette in the November issue of "Amazing Stories" magazine, "The Return of Sathanas," is by Bob McKenna, the ex-KDKA staffer and now head announcer at WEDO in McKeesport, and Richard S. Shaver, a Philadelphian with whom McKenna has already collaborated on several adventure tales . . . The Sammy Roens—he used to be Baron Elliott's press agent here and is now doing public relations for MCA in New York—have just

9. Muroc Air Field/Edwards Air Force Base

Army Air Base, Muroc, California was redesignated Muroc Army Air Field on November 8, 1943. Muroc Army Air Field is shown here in an aerial taken October 10, 1946.

Edwards AFB, Late 1953/Early 1954

- Late 1953-March 1954: Scully starts picking up intel, makes notes of a captured saucer with an occupant at Edwards. **These notes were never published. He's the first to know as far as I can tell.**
- 1/1954: **Broadcaster Frank Edwards** announces we had a **captured disc in California**
- Early 1954: ex-Naval Intel officer notes to Scully about **Edwards AFB lockdown, captured saucer, occupant in custody rumors.**
- **3/1/1954: US's largest h-bomb test (*Castle Bravo*) – radiological disaster**
- 3/24/54: Scully writes another private typewritten note indicating that the "Edwards Air Force item" is completely true: "Further data reveals that they still have the flying saucer, **held in Hangar 27. Apparently the man is still under custody**". (Also never published.)
- 4/1954: "Gerald Light" (occultist, BSRA member, "**a student of Gurdjieff**") reports of huge events at Edwards AFB. Eisenhower reportedly involved.

11/20/1953: In Scully's private archive at the AHC:
A letter to Newton (Box 3 FF1): "A live pilot was
captured". Never published.

But to lighter things. The reason Gene thinks it un-
wise to talk to you at his house is that he has good reason to
believe his phone is tapped. Some weeks ago he fell upon a
fantastic tale through that sound engineer at Disney's. It
seems, according to the story, a saucer landed in the area of
Edwards Air Base near Mojave. A live pilot was captured. He was
loathe to talk but he did point out on a map to the planet Mars.
The main difference he showed from earthbound mortals was that
his circulatory system was not operated by any pump similar to
our heart. Gene wanted to know if I could get in there through
some high member of the Air Force. I started to hunt out among
those with the rank at least of Brig Gen, when Gene called me
and told me to forget it because security had clamped down on
the thing. He had learned through Brian Dunlevy who was in
Navy Intelligence that nobody could get in or out of Edwards
for the moment. Not even phone calls were going through to
certain staff members.

January 24, 1954: Naval intel: "A saucer and a being off a saucer were in custody at Edwards air base". Scully never published this either.

January 24 Notes. Gene Dorsey, Frank Scully, Alice Scully

Around the middle of November '53, George Williams, former US Navy flier, with a total of 12 years flying experience, ~~xx~~ living in Sierra Madre, now an automobile salesman, working for the Ford Agency in San Fernando, (At the tail end of the war he was transferred to naval intelligence) ~~he~~ drove to the Rosamond Gate of Edwards Air Base at Muroc Lake, having heard that a saucer and a being off a saucer were in custody at Edwards air base. He was a friend of a technician working for Bell Aircraft sent out to work on a Bell Aircraft rocket ship which consequently set a new record (in December). Williams had visited his friend several times and had sold him a car. Due to his having been in Naval Intelligence he was given papers and security clearance ~~xxxxxx~~ to enter the base. On this Friday evening he went to the guard house and asked to see his friend. He was informed that there were no visitors allowed by the guard. He then asked if he could talk to his friend on the phone which the guard let him do. He got his friend on the phone and the friend apologized to him for not being able to get him in, as he stated the field was under security orders. While phoning he said he had difficulty in hearing his friend, due to flights in threes of both conventional and jet aircraft flying overhead at 1500 to 2000 feet altitude. They appeared to him to be circling and as he remarked flying 'legs' over the area. On being informed that he could not get in, he turned to go back to his car, and there were three MP's grouped and having a conversation. Being very disturbed about not getting in he said "What's going on around here. Have you got a flying saucer here?" The three MP's reacted to his remark by quick looks at him. He felt ~~xxx~~ it registered with them. He also noticed, as he was

2

driving out 3 or 4 cars with the sign Press on the windshield and two or three men inside sitting there smoking as though they were reporters waiting for some announcement.

He then decided to stop by the town of Rosamond and went into the first of three cocktail lounges. The place was practically deserted. He made the remark to the bartender. "Where is all of your business. Bartender remarked "I don't know. There hasn't been any for a couple of days." He went to the second cocktail lounge. Same story. The third bartender said: "You see that serviceman? He has been there for three days and he's the only one from the field." Williams walked over and being an exserviceman himself started talking old head to him and asked him what all this security business was all about, and the serviceman stated he didn't know. He had reported back to duty after a three or four day pass. They wouldn't let him back on the base and his leave had been extended and so he was waiting to get back on base.

Wednesday, prior to the Friday referred to, Brian Donlevy, on hearing of this supposed security said "I'll find out in a hurry. We'll fly up there. I've given a pool table and a lot of entertainment for the USO and done many favors for the base and am well acquainted with most of the top brass, and I have flown in there many times, and due to having been in the Air Corps intelligence during the war, have an opportunity of knowing first hand from seeing the reports, that the flying saucers do exist.

(Donlevy's reason to believe. A pilot went up with a B 29 and had fuel for 8 minutes but stayed up for three hours. - suspended by a flying saucer. A general, visiting the field at the time, was a down-on-earth witness to this. The time involved and the amount of gas, eliminated any possibility of a hoax. Andy Weil told Gene Dorsey

3/24/54: Scully notes - more Edwards AFB “data”. Again, never published. (Box #6 FF6)

March 24, 1954

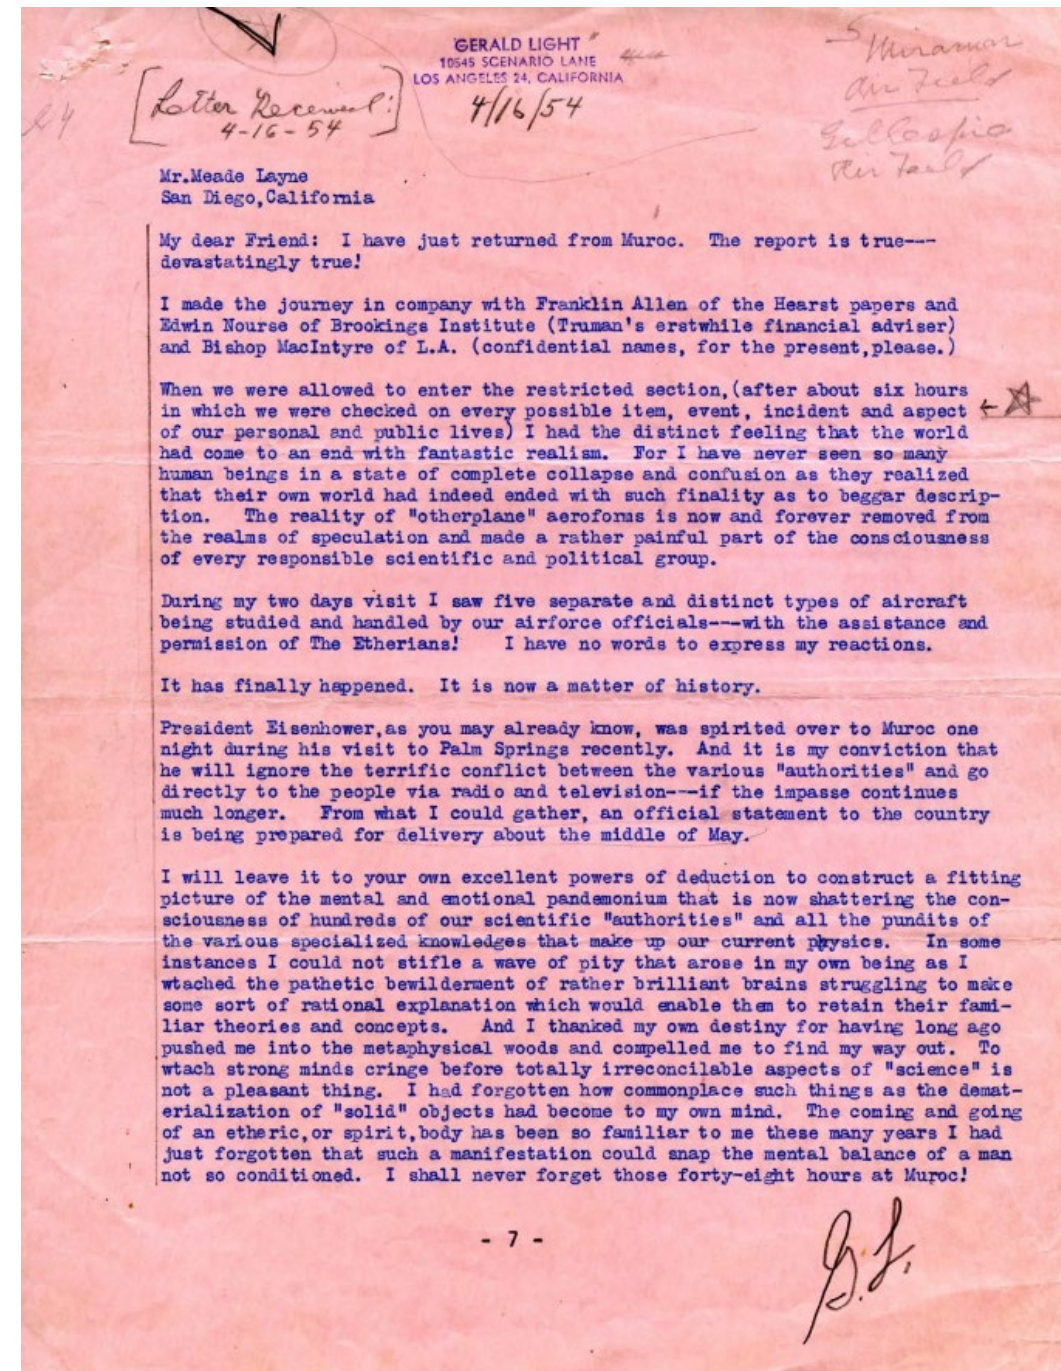

Follow up of Flying Saucer notes.

The Edwards Air Force item of a few months ago is still seemingly completely true. Further data reveals that they still have the flying saucer. It is being held in Building 27 - (which is a hangar) - and apparently the man is still under custody.

(through a very pretty girl in Little Rock, daughter of an ex-Times man, Morrison, who is very friendly with an officer in the camp.)

4/16/54: BSRA Archive: “Gerald Light” visits Edwards

- 4/16/1954: Famous letter from BSRA’s “Gerald Light” to Layne about a **“first contact” event at Edwards AFB**
- This is right after Frank Scully’s then-*private unpublished* notes about Edwards AFB on 3/24/1954.
- Light claims Bishop James Francis McIntyre present at Edwards – yet another Vatican connection.
- Both the BSRA and the unpublished Scully archives converge around an event at Edwards AFB, around Nov. 1953-Apr. 1954
- No evidence I’m aware of that suggests Scully was in communication with BSRA/Layne/”Light”

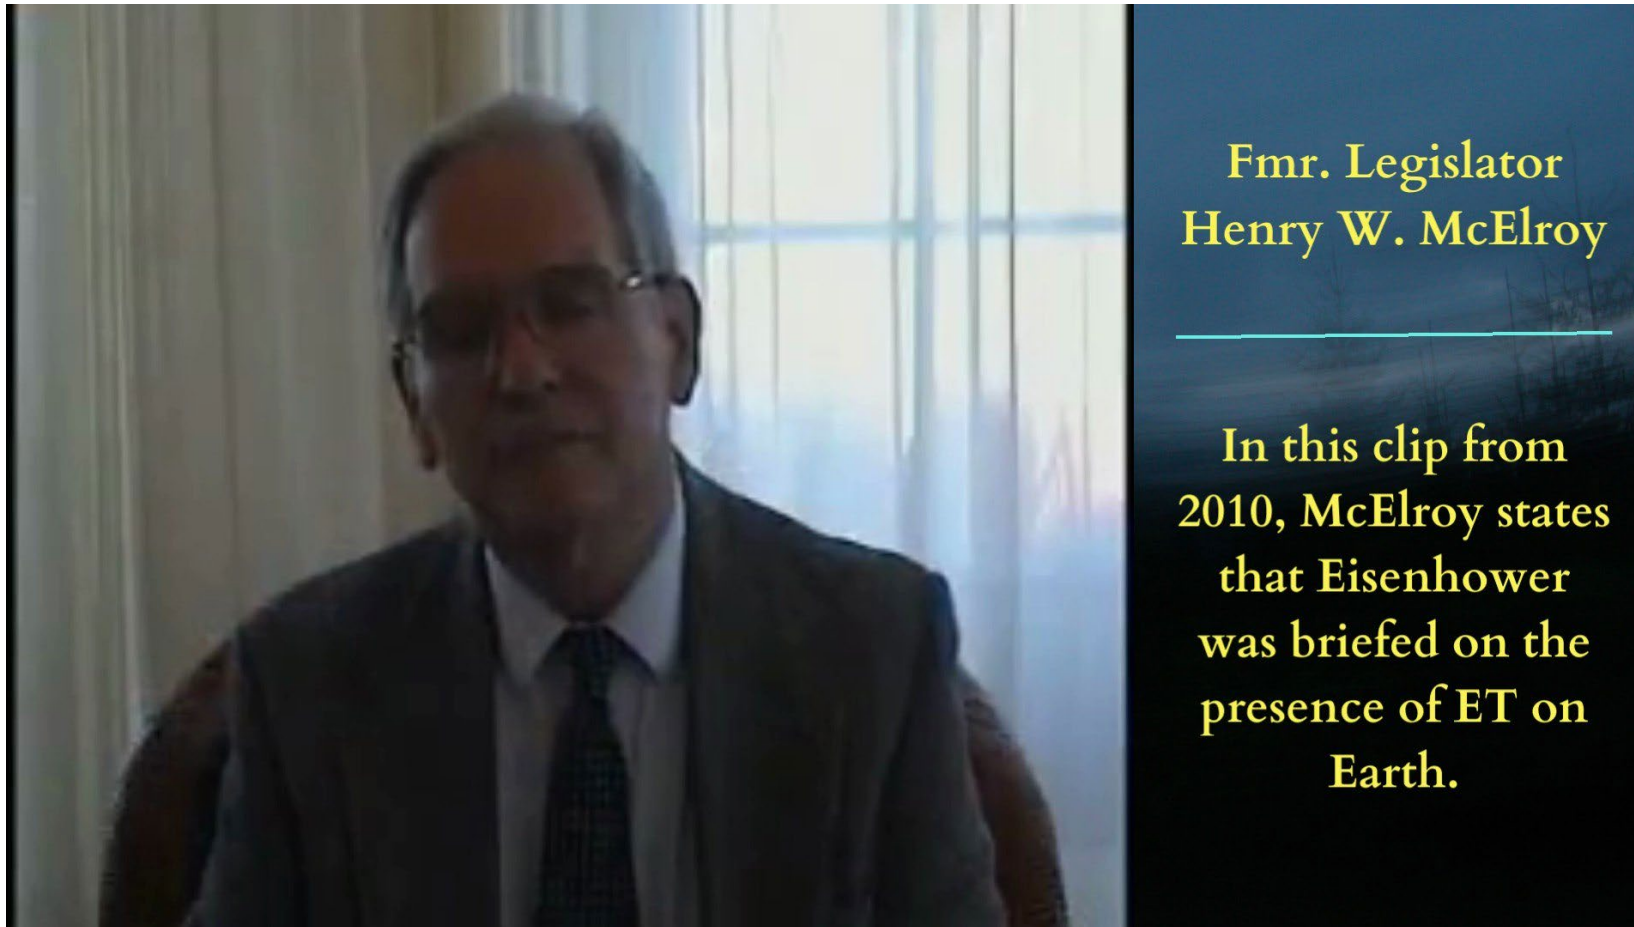

June 4, 1954: Excerpts from Stringfield's CRIFO newsletter, sent to Scully. (Box #6 FF6.)
“..told the US Gov. has captured discs”

INCIDENT 4: MANTLE OF MYSTERY SHROUDS MUROC (Edwards Air Force Base)

What is the Air Force concealing at Muroc? In a letter received from a source in California, I am told that the U.S. Government has captured discs. In the strictest secrecy these objects are being examined by the top "brains" of the country. In January when the lid of Air Force censorship was laid down, Frank Edwards announced that an "Object" was under examination in California. Edwards recently told me that the brass lid has been screwed down even tighter, that nobody is talking for the record, in fact, nobody's talking. However, this writer believes that if such discs are in captivity, it is understandable why the Air Force, in this instance, would prefer secrecy. Information regarding the discs propulsion, metal and structure would be "sugar" in the hands of the Russians.

2010: Former NH State Rep. Henry W. McElroy: Eisenhower briefed, said a meeting occurred

See <https://x.com/planethunter56/status/1668701996889829387> or
<https://youtu.be/NNV8-k5UvpY>

10. Conclusion – We Must Recover Our History

- Real radar and UFO/UAP history has been suppressed, classified, and now forgotten.
- **We're living in a state of mass amnesia** over UAP/UFO events.
- **ufology's demise has been greatly exaggerated.**
- New UAP related newspaper data is being unstoppably digitized.
- Many 1,000's of pages of **local newspaper archives are coming online every month.** (They couldn't censor them all!)
- AI is a total game changer for this sort of work.
- New software tools and apps can push forward our understanding of what actually happened.
- Frank Scully would have said this: UAP's are “**divine intervention**”.

3. 1940's-1950's Congressional Record Hits

1947: “Flying Disks” and “Saucers” Hits in the Congressional Record

- July 9, 1947 - on **the day after Roswell**, Senator Taylor (either Glen H. or Dean P. - I can't tell) said:

"Mr. President, the so-called flying disks or saucers, which have been so extensively reported during the past fortnight, could serve as a warning of what is in store for the peoples, not only of our own Nation but of every country on this little globe we call Earth. If these contrivances, flying at the terrific speeds which have been reported, are proven a reality, they will simply demonstrate once again how small this world has become, how open it is to attack by as yet unknown and undemonstrated weapons." (See <https://shorturl.at/Z7xa4>)

Mr. President, the so-called **living disks** or saucers which have been so extensively reported during the past fortnight should serve as a warning of what is in store for the peoples, not only of our own Nation but of every country on this little globe we call Earth. If these contrivances, flying at the terrific speeds which have been reported, are proven a reality, they will simply demonstrate once again how small this world has become, how open it is to attack by as yet unknown and undemonstrated weapons.

On the other hand, if it should be decided, after careful investigation, that this whole fantastic episode is the result of overwrought nerves, it will be a warning of future and more frequently occurring demonstrations of mass hysteria. As the tension increases in this age of uncertainty, life will become a nightmare haunted by fears and dangers—real and imaginary.

No amount or degree of military preparedness will avail us against such psychological fears and anxieties.

1951 (Korean War): Another “Flying Disk” Hit in the Congressional Record

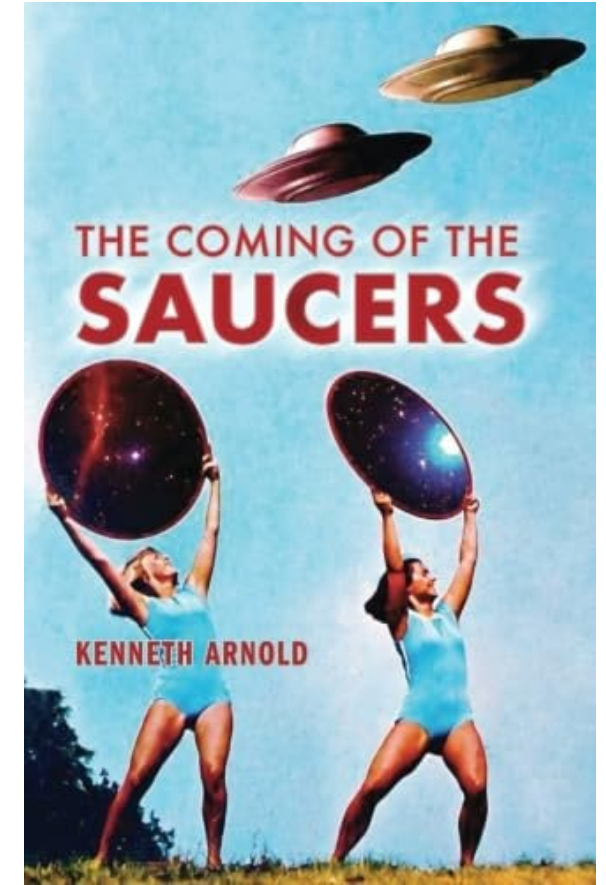

- 1951, 82nd Congress: Another Senate mention, by a Mr. O'Mahoney (D), while talking about Research and Development programs and the USSR:

“What I have just picked up is almost a flying disk. It is a new carrier for gasoline. It is made of synthetic rubber. It carries about five gallons of gasoline. It is now in use.” (See <https://shorturl.at/mFPnX>)

Members of the Senate will be interested, however, in looking at some of the objects on the desk before me. What I have just picked up is almost a **flying disk**. It is a new carrier for gasoline. It is made of synthetic rubber. It carries about five gallons of gasoline. It is now in use. It can be dropped to a tank or to any other vehicle using gasoline or other fuel, and it has been dropped from heights of from 200 to, I believe, 1,000 feet.

Beware: Modern Book Reprintings Can't be Trusted

- Left: Kenneth Arnold's original book (1952)
- Right: A modern reprinting
- Noticed a ~1952 advertisement in Scully's archive talking about **censored "dailies" in July 1947.**
- **Kindle version and modern reprintings don't have hits for the word "dailies" – what?**
- Kindle books can be total messes: untrustworthy

Dear Friend:

The photos in this folder are being sent to you for but one purpose--to prove to you that there is such a thing as a flying saucer.... and as a personal and private note from Kenneth Arnold and myself that we've published a book (available only through ourselves and not in bookstores) which is intended to cut through the smokescreen of misinformation, secrecy, censorship, false reports and biased analyses.

After four years of official and public ridicule, accusations of trickery, hallucinations and imagination, we've finally been justified by more recent events--but that isn't enough: the truth hasn't been presented yet! So, we've put that truth in book form, in an effort to set the matter straight.

The book contains 192 pages, and 46 photos, 32 of them of flying saucers. No other book has dared to be that specific. The proof is there, right before your eyes. It tells the facts about the tragic Tacoma Incident, which sent two high Air Force Intelligence Officers to their deaths. It analyzes the Project Saucer Report. It reports American and Foreign sightings, tabulating factual data in chronological order. It gives the first comprehensive history of flying saucers for 1000 years. (Yes, they were seen that far back!) It is handsomely cloth-bound, stamped in gold.

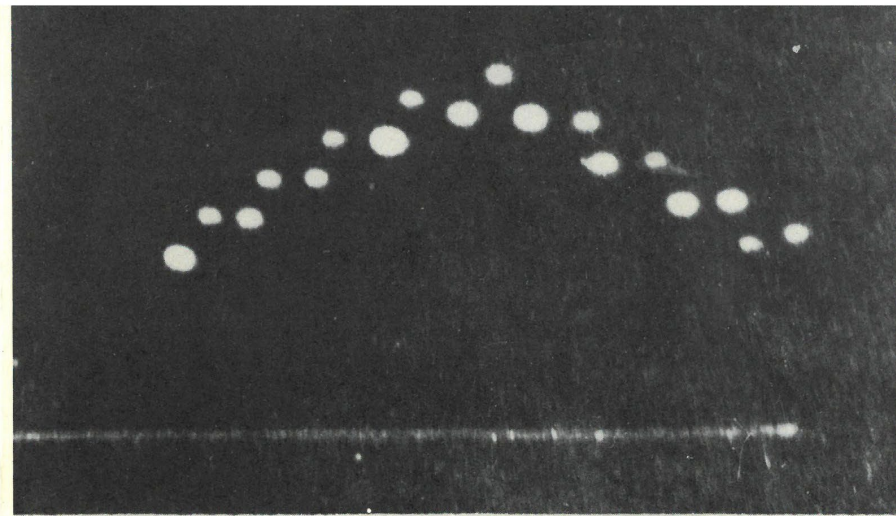

This is the only book which hasn't been successfully challenged; the only book in which speculative claims do not appear as fact. No lies, no trickery, no cheap publicity. As a matter of fact, we aren't going to make any money on it, because we refuse to commercialize it. That's why you can't get it in a bookstore.

With us it's a point of honor, and a recognized duty to tell the American people the truth!

Kenneth Arnold & Ray Palmer
Rt 2, Box 36
Amherst, Wisconsin

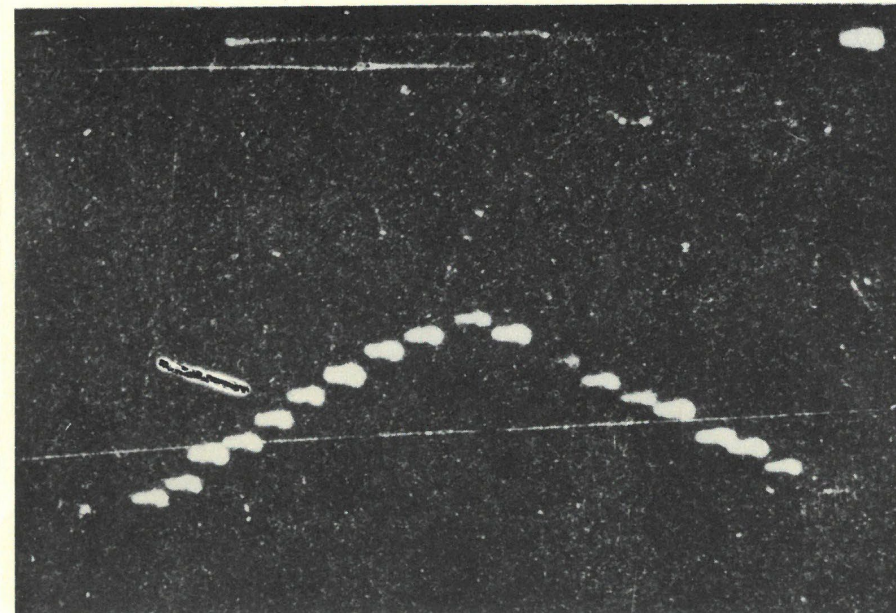

Above, the historic saucer which caused the censorship on July 10, 1947 halting its publication in all the nation's dailies just when the public was demanding proof of flying saucers. It was taken by William A. Rhodes, 4333 N. 14th St., Phoenix, Arizona.

Carl Hart, Jr., Lubbock, Texas, took these two photos of formations of flying saucers on August 30, 1951. Says the U.S. Air Force Intelligence team, now admitted to be continuing its flying saucer investigations in earnest: "These photos are legitimate." In one photo a larger "mother ship" can be seen off to one side, apparently controlling the mass flight.

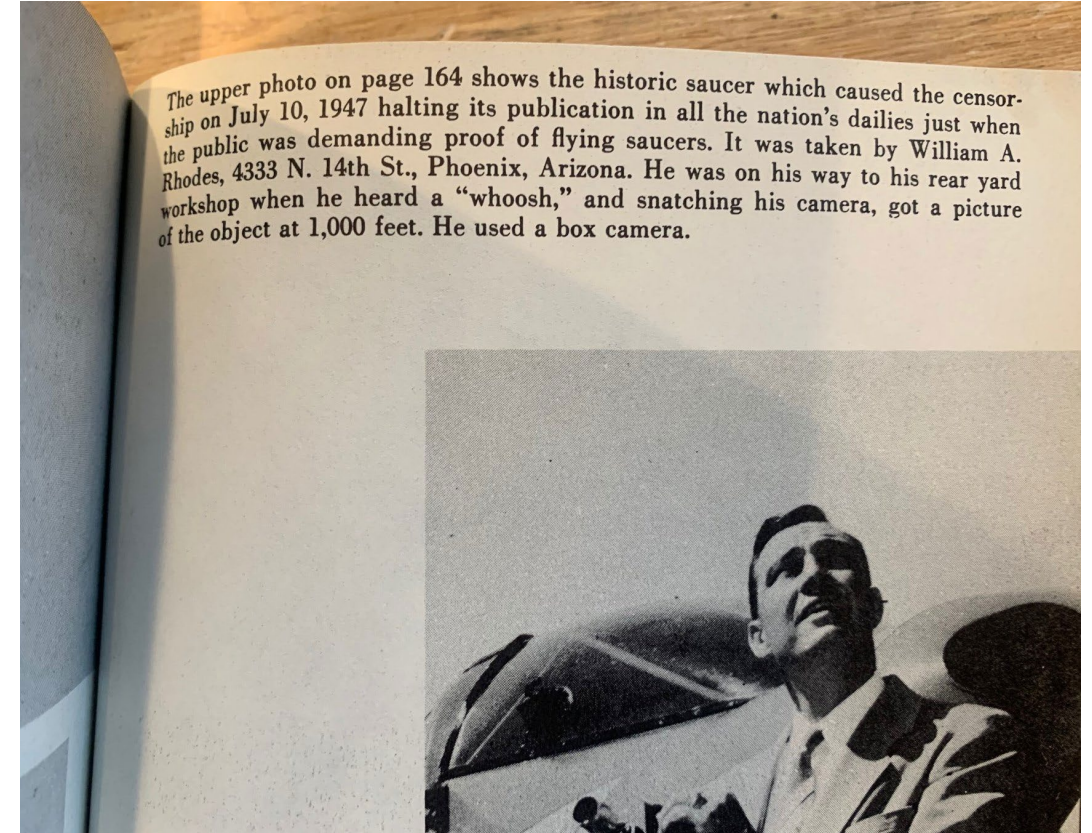

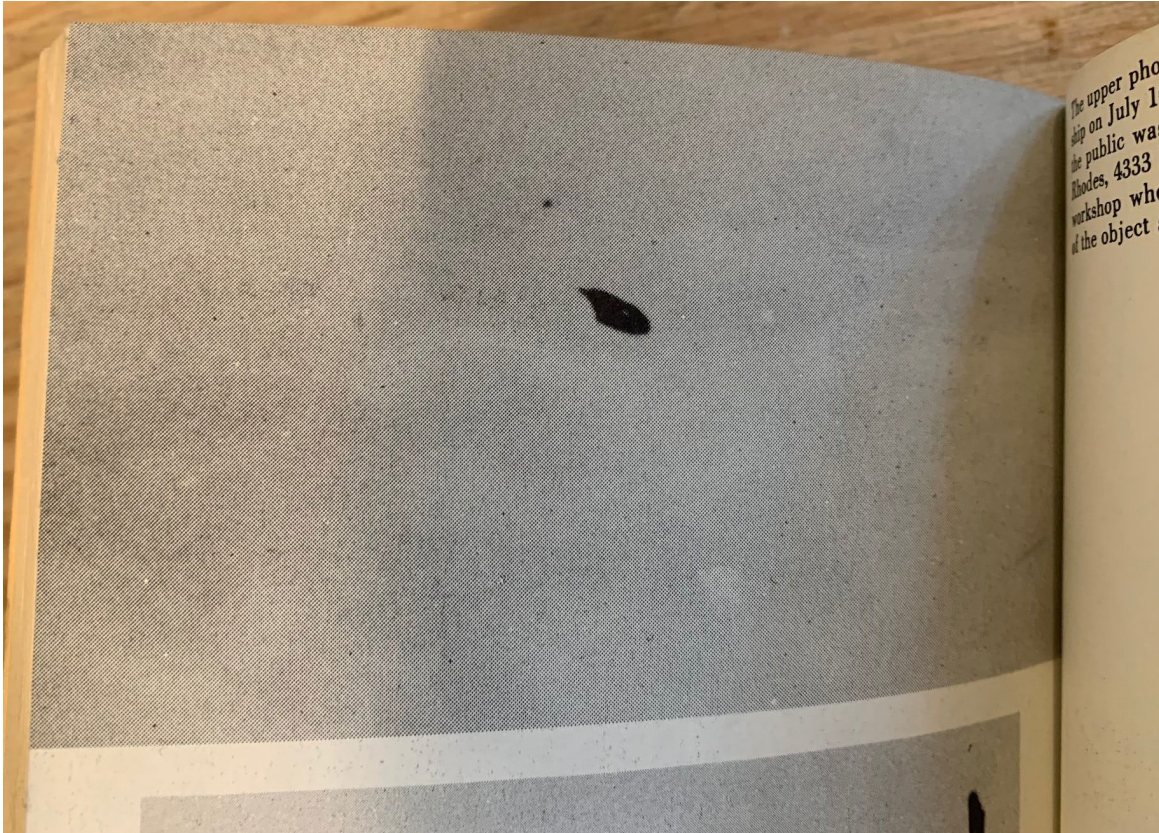

Below, first foreign flying saucer picture, was taken by Newsreel cameraman Enrique Hausemann Muller, in Spain, April 24, 1950. The object was described as being very luminous, of very huge size, and spun across the heavens with a rotating motion, giving off streamers or rays of flame like a fireworks pinwheel. Yet it seemed to be intelligently guided.

Above, the historic saucer which caused the censorship on July 10, 1947 halting its publication in all the nation's dailies just when the public was demanding proof of flying saucers. It was taken by William A. Rhodes, 4333 N. 14th St., Phoenix, Arizona.

UNIDENTIFIABLE OBJECTS,
WILLIAMS FIELD, CHANDLER,
ARIZONA.

14 July 1947

MEMORANDUM FOR THE OFFICER IN CHARGE:

On 8 July 1947, this Agent obtained pictures of unidentifiable objects, (Exhibits 1 and 2) from the managing editor of the Arizona Republic newspaper. The pictures were taken by Mr. [REDACTED] Phoenix, Arizona, at sunset, on 7 July 1947. The Subject objects flew at unconceivable speeds, making three circles in the vicinity of Mr. [REDACTED] home. The pictures were taken with a box camera, size 620. The photograph (Exhibit 1) was taken as the object passed in front of Mr. [REDACTED] and Exhibit 2 as the object turned towards Mr. [REDACTED]. The height of the object was estimated at 1000 feet.

AGENT'S NOTES: See Exhibits 1 and 2, photographs of unidentifiable objects, enlarged approximately 20 times. No further reports have been received by this office of objects seen by military personnel.

DOWNGRADED AT 3 YEAR INTERVALS:
DECLASSIFIED AFTER 12 YEARS.

Author/Researcher Leonard Stringfield (WW2 Army AF Intel) on Scully's book

- Stringfield: “**So completely was Scully's retrieval story put down** that some researchers today wonder, in retrospect, **if the book and/or its exposure were contrived**. And, despite denials and the suspicions of research, **the crash and retrieval stories persisted.**” (*Retrievals of the 3rd Kind - Part 1*)
- Before he died, Stringfield found more witnesses to the Farmington/Aztec C/R.
- See *UFO Crash Retrievals - The Inner Sanctum* (July 1991).

At least one witness saw *UAP's* in both centuries: 1890+1947

- Witness John Caldwell saw UAP's in both 1890 and 1947
- Reported both events to the *Austin Statesmen*, 1890 clipping provided
- 1947 report was on July 8, 1947 – same day as Roswell (interesting!)
- Reports like this demonstrate that **the phenomenon is not unique to the 20th century**
- **Many 1896/1897 sightings are just too similar to 20th century reports to ignore IMO**
- See <https://shorturl.at/9FHg2> and <https://shorturl.at/LKdRp>
- *Austin American-Statesman*, Tue., Jul. 8, 1947, Page 1

Thomas Edison was Inspired by the 1896/1897 “Mystery Airship” Sightings

- Right: *The Kansas City Gazette*, Apr. 29, 1897, Page 3
- Edison thought the sightings were fakes, but he then proceeded to predict airships, “will not be on the balloon idea”, “made of a very light material”, “raised by means of a powerful motor”
- **Edison nailed it:** The Wright Brothers’s first flight: 12/17/1903
- See <https://shorturl.at/pf9Ya>

EDISON'S OPINION.

An Airship Will be Made, But Recent Stories are Fakes.

New York, April 20.—Thomas A Edison has no confidence in recent Western stories of airships. He says they are fakes. He thinks an airship will soon be made, but it will not be on the balloon idea. He says :

“Whenever an airship is made it will not be in the shape of a balloon. It will be a mechanical contrivance which will be raised by means of a powerful motor, which must be made of very light material. At present no one has discovered such a motor, but we never know what will happen. We may wake up tomorrow morning and hear of some invention which sets us all eagerly to work within a few hours, as was

Dr. Robert Sarbacher on Scully's Book

- ~1 week after book published, on 9/15/1950, in a conference between Canadian Wilbert Smith and **Einstein Student Dr. Robert I. Sarbacher** (a **consultant to the US R&D Board**), Sarbacher revealed Frank Scully's 1950 ***Behind the Flying Saucers*** book is true and “substantially correct”
- Sarbacher: **Flying Saucers exist**, we haven't duplicated their performance, they didn't originate on the earth, subject **classified higher than the H-bomb**. **John von Neuman** and **Dr. Vannever Bush** definitely involved. Possibly **Robert Oppenheimer**. **Eisenhower** invited Sarbacher to attend **several discussions related to the retrievals**.
- See *Above Top Secret* by Timothy Good page 525, also see *UFO Crash Retrievals – Status Report III* by Leonard Stringfield.

BSRA Archive

- The BSRA archive is located at the huge AFU (***Archives for the Unexplained***) in Sweden
- A timely donation resulted in access to their *internal files*.
- Scanned by AFU workers and researchers.
- Contains letters, articles, notes, pubs, etc. dating from mid 1940's-late 1990's. Many internal, then-private letters and notes to/from **Meade Layne and his “associates”**. Incredible information; still parsing it.

BSRA Reported about Crash Retrievals

- They had “informants” around 1949. (Many blabbing around this time.)
- See Berlitz and Moore’s *The Roswell Incident* (1980), page 103.
 - Berlitz (1914-2003): Yale, linguist, US Army intel (13 years), founded the *Berlitz Language Schools*
- See: <https://shorturl.at/xSJTd>

Meade Layne, now deceased, former director of Borderland Sciences Research Foundation, Vista, California, made some memos, probably in 1949, concerning reports on some of the alleged participants in this scientific “call-up.” A memo has been furnished by Mr. Reilly Crabb, present director of Borderland Sciences Research Foundation.

Layne’s memo states that “on the basis of present information” he accepted the facts of the story as authentic. Of his sources, he said that his “most direct information involves three informants, two of whom are scientists of distinction, and the third a business man of high standing.

One of the scientists, a Dr. Weisberg, a physics professor from a California university, saw the disc himself and took part in the examination of it. He says the disc was shaped like a turtle’s back, with a cabin space some fifteen feet in diameter. The bodies of six occupants were seared . . . and the interior of

#2 Meade

April 16, 54

I am now preparing Bulletin #2 for mailing about Monday. I will add my testimony of the Muroc episode, for whatever it may be worth, and then go into some length about the next big move of the Commies to take advantage of the present public concern about the bomb.

My information is that a vigorous campaign will be started immediately to persuade America that Communist domination is much better than total annihilation. This will emanate from various groups of intellectuals who certainly have a case to present.

April 12

Already in TIME/there is this: "In a letter to the N.Y. Times, Author-Critic Lewis Mumford wrote: Submission to Communist totalitarianism would still be far wiser than the final destruction of civilization.... Let us cease all further experiments with even more horrifying weapons of destruction, lest our own self-induced fears further upset out mental balance..... Let us deal with our own massive sins and errors... and have the courage to speak up..... against the methodology of barbarism to whhhh we are now committed. If as a nation we have become mad, it is time for the world to take note of that madness....."

The purpose behind this campaign is something I was warned about nearly 20 years ago. Its particular intent, among other things, is to split the country into as many warring sections as possible. There is, of course, the ancient prophecy of America becoming a land of four separate nations or peoples. These have sometimes, rather simply, been itemized as a/ north, south, east and west division. And anyone with an ounce of ingenuity can easily fan local differences into a terrible hate.

Then there is the apparent treason of Oppenheimer, and some others. In the next Bulletin I will try to influence as many as possible to dig deeply under the superficial evidence for the real truth---and perhaps this man, and his friends, may not be martyred as others have already been. My instructors assure me that this man is not a Commie, nor even a sympathizer. But overwhelmed with the monster which he had helped to create, he believed that if Russia also had the science to make the bomb it might yet be possible to save civilization, even mankind.

This is a time for a display of that Christian idealism about which we are so proud, lest the jungle consciousness in each of us destroys every vestige of ^{our} sanity ~~xxxxx~~

I am working against a deadline to have another pamphlet on Etheria to serve as a companion book to Sings-Skies, when the news breaks next month and mob hysteria follows its traditional course.

This is just a hasty roundup of the matter as it stands now, and I will keep in touch with you for further co-operation. Will you please send me your phone number? It has vanished from my files in the confusion around here.

Cordially and fraternally,

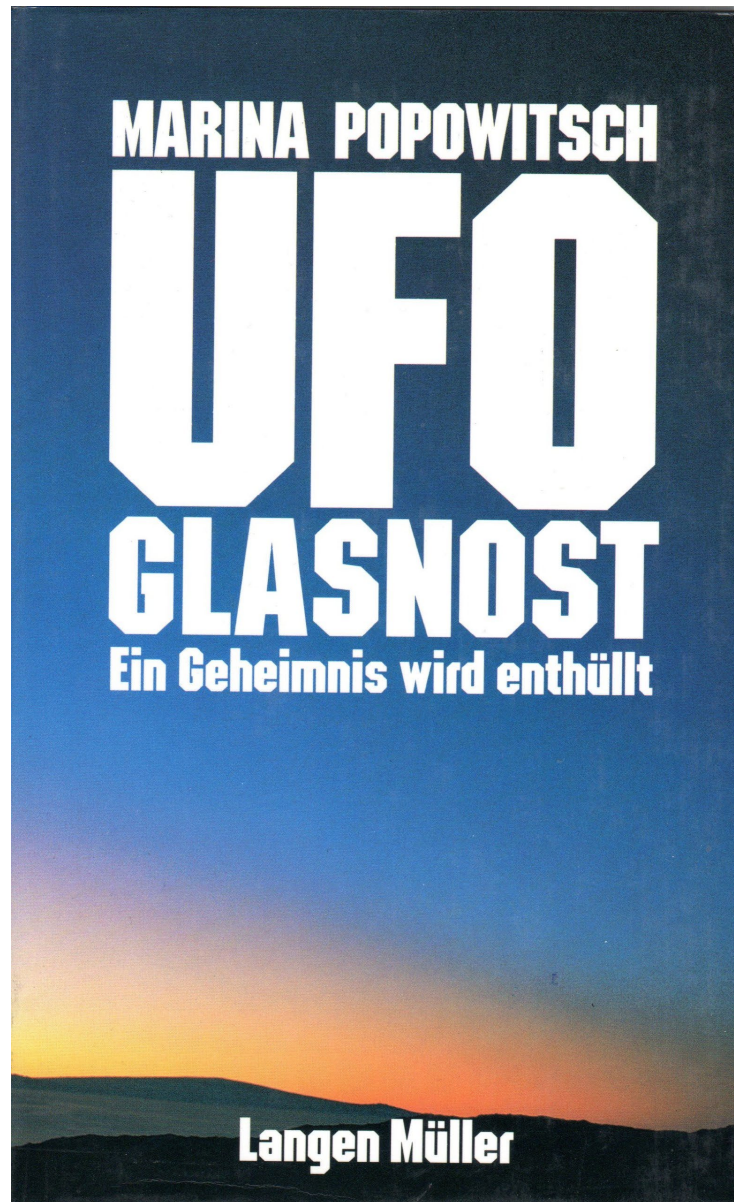

Another Example Whistleblower: *Disclosure* Project Witness Bill Uhouse

- Claim: “I spent 10 years in the Marine Corps, and 4 years working with the Air Force as a civilian doing experimental testing on aircraft since my Marine Corps days.”
- **He did serve:** See *The Evening Times*, Sayre, PA, Mon., Mar. 30, 1953, Page 3
 - <https://shorturl.at/xnsRN>
- Claimed to have **worked on a UAP craft simulator based on the craft retrieved from the 1953 Kingman AZ C/R.**

<https://ufo-search.com/>

- Free, no-frills, but no BS, UFO/UAP related research tools:
 - An open source **client-side search engine** for the ufo_data repository
 - The ufo_data repository data, organized into a single huge timeline with a KWIC (“Key Words in Context”) index
- **Searches are never sent to a server:** your browser downloads the ufo_data database and all searches are locally conducted 100% in your browser using WebAssembly. (So all searches 100% private.)
- KWIC indices, now old fashioned, are extremely useful for this sort of research (***what if you don’t even know what to search for?***)
- Bonus: **All articles from every Crash Retrieval Conference proceedings**, with a KWIC index and clickable Table of Contents (which links to the scanned articles on archive.org).

8. *UFO Glasnost* by Col. Dr. Marina Popowitsch – Translated to English with OpenAI

- **Col. Dr. Marina Popowitsch** (Popovich): Famous Soviet test pilot, trained as cosmonaut. **A connected, well-known Soviet aerospace insider.**
- Book translated from German using OpenAI 1 or 2 pages at a time.
- Incredible book that **corroborates many of the things being claimed today by Grusch and others, except from a Soviet perspective.**
- Dr. Donald H. Menzel's (20th century debunker, elite high security insider, rumored MJ-12) book *Flying Saucers* misled the Soviets for years. **Dr. Felix Ziegel, the Soviet UFO expert, saw through Menzel's ruse by the late 60's.**
- **Soviets started tracking UFO's on radar starting in ~1947 (Ziegel)**
- Soviets investigated UFO landing sites: **found strong temporal anomalies**
- **Many Soviet pilots were injured in UAP encounters**
- **The Soviets claimed through Popowitsch to having UAP materials ("fragments") shortly before the Soviet Union fell in 1991**

Luder Valley: Secret High-Tech Aircraft Deployed Years Before the Public Knew

- **Helicopters used by American and German secret agents:**
“..experimental jobs, hard to handle and not overpowerful, but indispensable for their work”
- **Were secretly deployed for special operations forces in 1938,** “and it wasn't in the newspapers”.

*A lot of you fellows are going to kick about these helicopters being in use by German and American secret agents before they are in use by the army of either. But I myself saw practical heli flights in Newfoundland in '38. I think the ships have been in use by the services of both countries: experimental jobs, hard to handle and not overpowerful, but indispensable for their work. It is the only way I can explain what I saw myself—and it wasn't in the newspapers. Naturally, the only conclusion to be reached is that the secret services got the helicopter on the Q T before anyone else. One can see why this was so.—*Author.*

G. I. R. - 101 Mr. Fletcher
EX-57

The Maury Island Incident: Background (FBI's 1947 "Security Matter X")

- On June 21, 1947, **3 days before Kenneth Arnold's famous formation sighting over Mt. Rainer**, witness Harold Dahl (1911-1982) was on his patrol boat near Maury Island WA (Tacoma area). His dog, son, and 2 crewman were on the boat.
- Claims to have spotted 6-9 very large "**doughnut-shaped**" craft.
- An object began spewing forth 1,000's of pieces of material resembling "lava rocks". Some fell onto their boat, killing his dog and injuring his son.
- As is typical in this very analog/Forcean space, the case was *supposedly* debunked and a "hoax" (hah!).
- Dahl's boss Fred Crisman gets involved. Crisman was an infamous "spooky" 20th century CIC/counterintel agent extraordinaire.
- Some materials sent to publisher/editor Ray Palmer (1910-1977) in Chicago area. Story involves MiB's. Dahl & family quickly fled in panic to Oregon.

April 18, 2017: WA State Senate Resolution #8648: “The FBI’s conclusions and Dahl’s secret were sealed for fifty years.”

SENATE RESOLUTION 8648

By Senators Keiser, Nelson, Palumbo, Hunt, Zeiger, McCoy, Conway, Rivers, Miloscia, and Fain

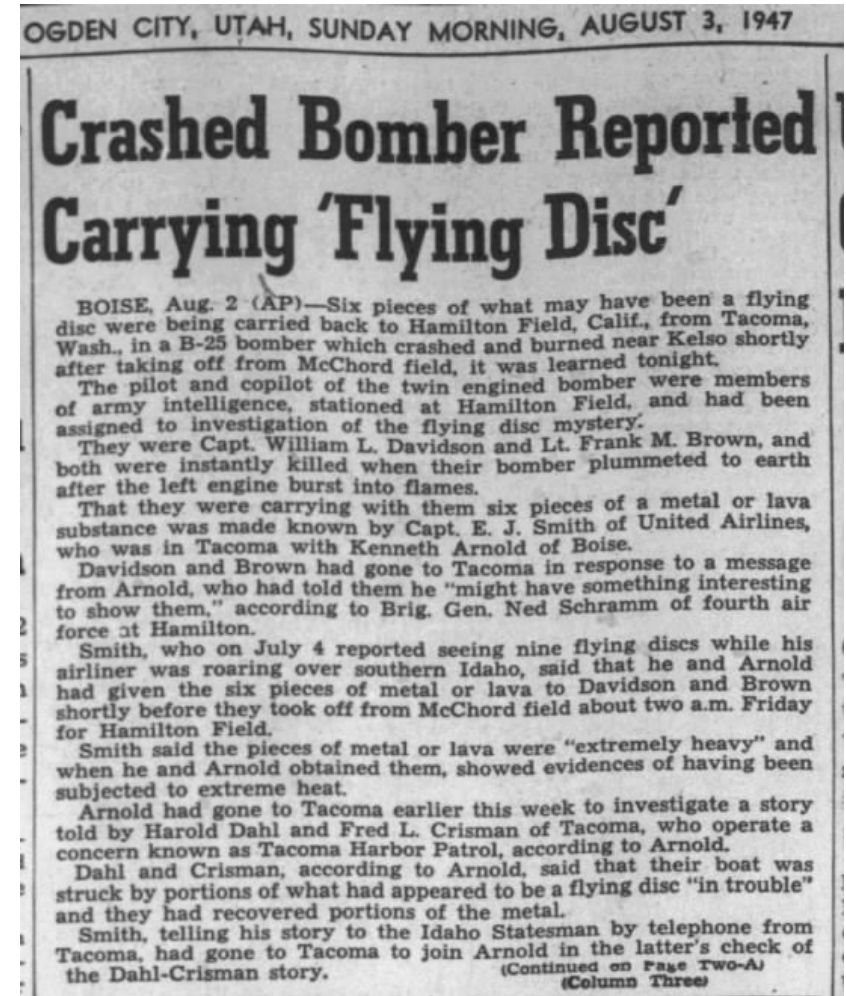

WHEREAS, On June 21, 1947, Tacoma resident Harold Dahl and his son allegedly sighted six flying discs over Puget Sound near Vashon-Maury Island, an event now commonly known as “The Maury Island Incident”; and
WHEREAS, On June 22, 1947, Mr. Dahl alleges he was warned not to talk about what he saw by a man dressed in a black suit; and
WHEREAS, On June 24, 1947, pilot Kenneth Arnold alleges he saw nine unidentified flying objects (“UFO’s”) near Mt. Rainier; and
WHEREAS, These controversial sightings helped launch a pop culture phenomenon of UFO sightings across the United States during the summer of 1947, which became known as “The Summer of the Saucers”; and
WHEREAS, On August 8, 1947, two weeks after the Washington sightings, a UFO is alleged to have crashed outside Roswell, New Mexico, and this alleged crash has since become the most well-known alleged UFO incident in history; and
WHEREAS, On August 1, 1947, Army Air Corp Intelligence Officers Capt. William L. Davidson and 1st Lt. Frank M. Brown, who interviewed Harold Dahl about his sighting, lost their lives when the B-25 Bomber they were piloting crashed outside of Kelso, Washington; and
WHEREAS, Following the tragic deaths of Davidson and Brown, Harold Dahl publicly claimed his sighting at Maury Island was a hoax; and
WHEREAS, Special Agents of the Federal Bureau of Investigation conducted an investigation of the deaths of Davidson and Brown and ultimately concluded that Dahl did not recant his story but that his claim of hoax was itself a fabrication to avoid further public attention and ridicule; and
WHEREAS, The FBI’s conclusions and Dahl’s secret were sealed for fifty years; and
WHEREAS, The Maury Island Incident and its surrounding circumstances have made immeasurable contributions to Washington State’s cultural heritage and to popular culture worldwide, including most recently the 2014 award-winning motion picture “The Maury Island Incident,” and the 2015 web series “The Maury Island Incident,” produced in conjunction with the Washington FilmWorks Innovation Lab and Motion Picture Competitiveness Program; and
WHEREAS, On April 1, 2017, the 3rd Annual Burien UFO Festival will be held in the newest hipster hangout of downtown Olde Burien with wide community participation and good humor; and
WHEREAS, On the seventieth anniversary of the seminal UFO sightings events, the Washington State sightings should be recognized for both their prominence and primacy in the modern era of UFO popular culture;
NOW, THEREFORE, BE IT RESOLVED, That the Washington State Senate pause to acknowledge the seventieth anniversary of the June 21, 1947, Maury Island Incident; the 1947 “Summer of the Saucers” popular culture phenomenon launched worldwide by these controversial events; and the first reference to the characters now popularly known as “men in black”; and
BE IT FURTHER RESOLVED, That the Washington State Senate recognize and honor the heroism and service of Army Air Corp Intelligence Officers Capt. William L. Davidson and 1st Lt. Frank M. Brown, who lost their lives following their investigation of the Maury Island Incident when their airplane crashed outside of Kelso, Washington, on August 1, 1947; and
BE IT FURTHER RESOLVED, That copies of this resolution be immediately transmitted by the Secretary of the Senate to the Air Force Historical Research Agency, to the Vashon-Maury Island Heritage Association, to the Des Moines Historical Society, to the Highline Historical Society, to the Burien Historical Society, to the Longview-Kelso Historical Society, and to the Washington State Historical Museum.

I, Hunter G. Goodman, Secretary of the Senate,
do hereby certify that this is a true and
correct copy of Senate Resolution 8648,
adopted by the Senate
April 18, 2017

HUNTER G. GOODMAN
Secretary of the Senate

Maury Island: A serious matter. Men died.

- **Aug. 2, 1947: 2 members of Army Intelligence died after their plane burst into flames while carrying potential flying disc fragments** retrieved from the Maury Island Incident.
- These "extremely heavy" and heat-exposed fragments were also being analyzed at Chicago University.
- Analysis of these materials was published by BSRA, announced in UK.
- See shorturl.at/RQR1G

Late 40's: Accomplished sci-fi authors were in close communication with BSRA/Layne

- A confidential 1947 Letter to BSRA director Meade Layne, found in BSRA archive: **Roger P. Graham** (pen name "**Rog Phillips**") about the Maury Island Incident
 - AFU Filename: "Meade Layne\Meade Layne, Roger P. Graham correspondence\470828 Letter from Roger P. Graham to Meade Layne.pdf"
- Some retrieved materials sent to Ray Palmer from Tacoma. Later said to be confiscated from him.
- Graham: **Maury Island craft used an atomic powerplant, radioactive blocks of metal purified and ejected**
- *Hey - this matches info in Majestic Documents.*
- How did Graham know? How did the author(s) of the much later Majestic Docs know?

Dear Meade,

Your card just arrived. Guess you are right about copyright. Only trying will tell whether idea is good. At least you can't lose on it. What is your present circulation and how much of an increase could you stand? Unlimited?

Will see Ray tomorrow and remind him again to send you material.

Do not quite understand what you mean by "worked out on levels above the etheric". I thought that in the conventional sense etheric was the highest level, so to speak, with astral and physical considered below it. I gather, though, that what Rusty meant was that the flying saucers are constructions from the realms of highest development. The ethereans of Oahspe, or the arch angelic hosts.

The idea of Russian origin is absurd, but not impossible. I would say it is ALMOST impossible, though, and that we may ASSUME with confidence that they have not discovered the principle of flight involved, nor developed the technique and the metals.

I'll give you some of my reasoning to date on them. Keep it in your files, but don't pass it around for the present. Two reasons. One: if what I think is going on IS going on, it might not be safe. Two: if I am wrong on what I think is going on I may be able to make a fortune on it eventually, if I am right on the principles.

Take the material dumped at Tacoma. A senseless mixture with no practical use. A mixture that does not occur in nature. Let's picture the atom power plant of the future. In it there is a process of disintegration going on which produces two things, - power, and non-radioactive elements which eventually form a drag on the radio-active process. Every so often the blocks of radio-actives in the power plant would have to be processed and the dross taken out. Depending on the type of radio-actives in the plant, the waste materials would take somewhat the constituency and form of the stuff dumped. Also the same general appearance. It would be gotten by melting the radioactive blocks of metal and purifying them. It would not be radioactive in an efficient system of purification. I feel sure, myself, that that is the source of that stuff.

Why was it dumped where it was? A poor shot. Ordinarily when such a ship is in the atmosphere it would dump the stuff in the ocean or some body of water. Tacoma is on Puget Sound, and it seems fairly certain that the stuff was AIMED for the open water.

Now for the drive principle. (1) Like electrical charges repel each other. (2) A hot plate with a high electrostatic potential is a strong ionizer. A neutral atom striking such a plate would have at least one of its electrons stripped from it if the charge were positive. The electron would be drawn into the hot plate and thence through the machine that maintains the high charge on the plate. The ION would be REPELLED by the plate due to LIKE charges, - thus causing a THRUST against the plate.

Take the material dumped at Tacoma. A senseless mixture with no practical use. A mixture that does not occur in nature. Let's picture the atom power plant of the future. In it there is a process of disintegration going on which produces two things, - power, and non-radioactive elements which eventually form a drag on the radio-active process. Every so often the blocks of radio-actives in the power plant would have to be processed and the dross taken out. Depending on the type of radio-actives in the plant, the waste materials would take somewhat the constituency and form of the stuff dumped. Also the same general appearance. It would be gotten by melting the radioactive blocks of metal and purifying them. It would not be radioactive in an efficient system of purification. I feel sure, myself, that that is the source of that stuff.

Why was it dumped where it was? A poor shot. Ordinarily when such a ship is in the atmosphere it would dump the stuff in the ocean or some body of water. Tacoma is on Puget Sound, and it seems fairly certain that the stuff was AIMED for the open water.

Now for the drive principle. (1) Like electrical charges repel each other. (2) A hot plate with a high electrostatic potential is a strong ionizer. A neutral atom striking such a plate would have at least one of its electrons stripped from it if the charge were positive. The electron would be drawn into the hot plate and thence through the machine that maintains the high charge on the plate. The ION would be REPELLED by the plate due to LIKE charges, - thus causing a THRUST against the plate.

-2-

On the other "side" of the electrostatic machine would be a similar plate with an equally high negative charge. Made of some material with high electronic radiative properties such as that that filaments in radio tubes are made, and also heated to the right temperature, it would shoot off the electrons which would repel the ship as soon as they broke free, producing another drive plate.

The drive produced from the positively charged plate would be the greatest, because it would be repelling ions of matter instead of low mass electrons. Nevertheless, under a perfected setup BOTH plates would produce a strong drive.

The charge that would effect this result would be in the millions of electrostatic volts. The plates holding the charge would have to be insulated and far enough apart to prevent arcing. They would also have to have a large enough area to produce powerful thrusts.

One charged plate could be on the bottom of the ship, - perhaps the entire bottom. The other could be a narrow section of ring about the circumference. Several such ring sections could be used, and the charge placed in the ones in the stern, being switched to others in the circumference to change direction of travel.

The charge could be reversed. Thus, if the ship wished to gain speed the positive charge could be in the circumferential rings. When lift was required the positive charge could be placed in the bottom plates.

Now then, when such a ship leaves the atmosphere it encounters mostly hydrogen in the upper stratosphere. With sufficient charge on the plates it could separate the electron and the proton at each plate, shooting out protons from the positive plate and electrons from the negative plate. In space there would still be sufficient atoms drifting to produce an effective drive.

In a rocket, the recoil mass is carried with the ship and shot out through the rocket tube. In a ship with the drive principle described above no recoil mass would need to be carried by the ship. It would utilize the material it encountered in its passage, even in interstellar and interplanetary space. Where it would need the greatest supply of material around it would be in strong gravity fields near planets, where the greatest density of such material exists.

If such a ship were to land on the Earth it could not take off *Bender* unless it landed on a high, towerlike structure with plenty of insulation between it and the ground and plenty of air to form the material for the first lift. If it DID land on the Earth the bottom plate could not hold a charge. The charge would dissipate into the ground. If it were too near the ground the charge would arc across the gap to the ground and cause the ship to fall. Therefore such ships would have to stay up if they did come. Even if they were friendly they would not dare to land because they would be grounded permanently. They might send individuals down by parachute, with the hope that they could get planes to go up in the air again and land on the top side of the ship. They might even carry jet powered or propeller driven ships for the purpose of visiting on the surface. They probably would. There might even be such individuals on the surface right now, investigating!

Where are they from, and what do they plan? There we come again to the part I don't care to discuss yet. I may put it into a story this fall. I don't think it will "break" and spoil the fiction effect of the story for a year or two yet, at least. And, of course, I may be entirely wrong.

Keep all this under your hat for the time being, Meade. I plan on performing an experiment soon to measure the drive thrust of the setup I described,

s. that I can determine the mathematics of the thing.

What I'll do is paste a sheet of metal foil on one side of a sheet of some insulating material with heating wires imbedded to raise the temperature of the thin metal sheet up to the glowing point. That will take a little planning on types of materials. Then I will charge the plate at various electrostatic voltages and, with the plate resting on a frame that rests on a scale, I'll measure the lifting force produced for various voltages of charge. From that I can form equations for area and charge, and rough estimates for materials and temperatures, so that I can determine whether enough drive and lift force could be produced to run a ship such as a flying saucer of large diameter. Then I should know. If the experiment gives VERY favorable results, it might be possible to build flying ships using that principle, small enough to be used commercially. Hence, the patents on that would be worth a fortune. So if it got around at present someone might get ahead of me on it.

Also I think that principle is the ONLY one upon which a successful space ship could be made. Rocket ships will never be any good. Even with atom explosions they would need most of their weight for propulsion to get away from the Earth. If my guess is right on the amount of drive this setup would produce, it would take no more power in the power plant to go to Mars or Venus than it now takes a B29 to cross the ocean!

What do Lingford and Lo Su n Yat have to say about me lately? I am always very curious about me, as you know. If it's flattery, fine. But if it's dire prophecy or sharp criticism, I'm VERY interested. I often think I will find out more about myself from my enemies than my friends. Friends get into the habit of hiding anything not flattering.

By the way, I sorted my RRs and FRs the other day. I would like to get my collection complete if possible. I lack ALL of volume one of RR, and my oldest copy of FR is the Sept. 1946 number. Do you have them, or any part of them? Will pay any reasonable price above the original price to get them.

Roger

ROGER P. GRAHAM

305 STUDIO BLDG.
1713 SHERMAN AVENUE
EVANSTON, ILLINOIS

Sept. 6, 1947

Dear Meade,

Got your telegram last night after getting home from the Chicago office. Ray was with me, so we discussed what to do.

Ray has accumulated a mass of evidence that consists of accounts sworn to before notaries and signed by several witnesses in most cases. Also Arnold's sworn statement, plus some of the material at Tacoma, plus a spectroscopic analysis of it, plus notarized opinions of experts about that stuff. In addition he has photographs much better than any that have appeared in print, with sworn statements about them, of the flying saucers.

It is going to be published in a magazine that has no connection with Ziff-Davis, but we are having trouble finding a printer so far. So the date it will appear is not certain yet.

Ray plans on sending you some of the sworn statements for your files as soon as he gets through with them. In that way they will not all be in one basket. The F.B.I. has their eyes on him, and if they knew of the plans we have they would stop them, because the saucers are squelched now in the news.

They exist and the government knows they exist, but doesn't want that known to the public.

So, after talking all this over, we thought the best you could do right now is announce that in the near future complete proof of the existence of the things will appear on the magazine stands throughout the country, and when it does you will announce the name of the publication in RR. But don't mention the name Ray Palmer in connection with it in print because the F.B.I. has been to see him already and would get tough and demand to see the originals and probably seize them, if they got definite evidence of their existence.

What he hands out on the editorial page of Amazing Stories is passed off by the FBI as so much hogwash ballyhoo dished out to the readers, so is not proof like it would be if you seriously announced that Ray had the evidence he has.

I thought of sending you a telegram in reply, but see that this will probably reach you Monday or Tuesday, and be in time for your deadline, and give you a better idea of what you should say.

Got a letter from Jack Tate this week. He made connections with Modglin Co. Plastics. That is a big company and he will probably find it good to stick with, and may wind up on the west coast by spring.

Roger

See Majestic 12 5th Annual Report, Annex C, Page 14: Maury Island “celestial [sic] fragments containing metal from a nuclear reactor from a UFO”

6. The death of two Air Force counterintelligence officers in the crash of their B-25 aircraft enroute to Hamilton AFB, California, after interviewing two auxiliary CG men who reported six UFOs over Maury Island, Washington, in June 1947. CIC agent Crisman had spoken to Kenneth Arnold, who on 26 June 1947, had reported a flight of UFOs over Mt. Rainier, Washington, and filed his report after he had spoken to Captain Davidson and Lieutenant Brown. The material given to Davidson and Brown was believed to come from Maury Island and may be celestial fragments containing metal from a nuclear reactor from a UFO. Fragments were turned over to CIA agent Shaw, and Crisman was ordered to the Alaskan ADC for assignment in Project IVY.

Maury Island Incident Realizations

- ***Crisman was inserted into the picture to contain the situation.***
- The probability that Fred Crisman (CIC - counterintel) was actually *originally* witness Harold Dahl's boss is virtually 0.
- They likely threatened Dahl to go with the **invented Crisman narrative** to help **contain** the situation, hence the MiB and phone/room tapping of Arnold.
- **Something very big happened days before Kenneth Arnold's sighting.** They likely inserted Crisman as Dahl's new "boss".
- Crisman was then assigned to "Alaska" to work on classified a/h-bomb testing program security related matters.

Edwards AFB 1954: Dozens of leaks. Too many to list.

Eisenhower Feb/April 1954 Edwards AFB Meeting Notes/Leads

1. Don Phillips (mil background verified)

"Mr. Phillips further states that there are records and filmed documentation of meetings in California in 1954 between ETs and leaders of the USA."

<https://pastebin.com/xFuA52Qv>

2. Navy Commander Charles L. Suggs (mil background verified) - as told by his son Marine Sgr. Charles L. Suggs (mil background verified)

3. Hank (Gert) Krastman (mil background+NATO statements verified) - saw Einstein and Paperclip Germans at Edwards

The Unexplained magazine Vol. 4, No. 2, 1993

4. Henry W. McElroy, Jr. video - he actually got the info from ex-CIA "Agent Kewper" aka Oscar W. Wolff ("oldest son" or "son in law" extended family connection)

5. Gerald Light (unverified - BSRA/BSRF) - his 2 page letter, also his Lodge of Light publication about him going on a desert retreat.

6. Meade Layne's claiming he had corroboration of Light's account on a letter in BSRA archives/AFU

7. BSRA archive letter from McGraw Hill dude, wrote letter to Edwards base commander

8. Scan of BSRA envelope containing addresses, from BSRA archives/AFU (on Medium now)

9. Franklin S. Allen - was real guy. Have built his ancestry.com tree and he was living in LA area at the right time.

<https://twitter.com/richgel999/status/1556791420547211269>

10. Earl of Clancarty, a member of Great Britain's House of Lords, who repeated the testimony of a air force plot in the 90's about the meeting, the shutdown of the base, etc.

11. Desmond Leslie, and Mrs. Scully also reported on the meeting:

https://archive.org/details/charles-berlitz-william-l.-moore-the-roswell-incident-1980_202012/page/n87/mode/2up?q=%2210545+Scenario+Lane%22

Valor Magazine Oct 9, 1954

12. Cardinal McIntyre - Vatican SIV connection:

"Among others in attendance at that meeting was James Francis McIntyre, the Cardinal Archbishop of Los Angeles. Two days later, Cardinal McIntyre traveled to Rome and met with Pope Pius XII. The result of this meeting and the revelations the Cardinal imparted to the Holy Father, the Servizio Informazioni del Vaticano was formed."

<https://forum.rpg.net/index.php?threads/the-omega-secret-vatican-ufo-conspiracy.301627/>

A more complex account is in various books (use Google books).

13. Giant Rock meeting. Air Force Intelligence was invited, right before event.

<https://twitter.com/richgel999/status/1556101122808504321>

14. Phillip J Corso (mil background verified)

Spoke of the Eisenhower meeting (and a "surrender") in his book "The Day After Roswell" and his personal manuscript.

1/24/1954 Scully's Raw Notes (Box #5 FF6)

This individual was one of three from one of the major industries of the country (railroad), having been screened and ascertained as to his loyalty to the country and passed ~~xx~~^{other}/security risks which was deemed by the authorities as necessary. The industrial group, of which this man was a member was made up of various major industries who meet periodically to discuss problems that are currently confronting the country. The latter part of November, he talked to the chairman of the group and asked him ^{what} was the subject would be for discussion. The proposed ~~xx~~ meeting was to occur in the early part of December. The chairman stated the subject would be unidentified aerial objects, née flying saucers. The chairman was then asked if this subject was important enough and if there was enough information on it to warrant such a discussion.

1/24/1954 Scully's Raw Notes (Box #5 FF6)

The chairman's reply was "Yes, there's a great deal on it and its very important, that the government has in custody several beings from off a saucer and what to do with them was a great problem. The chairman was then asked "Where is the meeting to be held?" The answer was "I'm not sure, but I believe Muroc Dry Lake." A meeting subsequently was held, but not there.

Original story as we heard it was that a metalurgist had been called to Muroc to examine one of these unidentified aerial object, *nee* saucer. The subsequent information received by the writer was to the effect that there was not only a saucer in custody but also a being off the saucer who was of less then average, or small, size earth being. He spoke English and when being questioned as to the origin from which he came was very reluctant to tell. That finally a map of the heavens was placed in front of him and he pointed to the planet Mars. That he was very concerned and disturbed at being in custody. Doctors had been called in to examine him. The resemblance was similar to human beings as we are familiar with them on this planet, with the exception that they could find no heart.

(When Beam asked Wheeler what he had to prove he was not like us he answered. Our circulation ^{try} system is differnt to yours on earth, more like a tree and plantlife, it is cellular, rather than corpuscular. Beam asked if he should cut off a piece to find out. Wheeler leaned over and made a gash in his finger, which was supposed to be evidence . . . and then some people came and we heard no more.)

May 20, 1954: “..pulverized 30 diamond drills without any effect whatsoever.” (Unpublished)

May 20, 1954

One CIC officers has told Mr. May (Major) that they have in trying to see what kind of material saucers were made of pulverized 30 diamond drills without any effect whatsoever. This was about three weeks ago he got this information, but it could have happened a long time ago.

Mr. May got interested in saucers when he lived in Idaho, in fact very near Maury Island during those events there. Has been to George Van Tassel's place several times, but got cold feet and didn't go for the convention.

Feels he is still sitting on the fence, doesn't know whether saucers are or aren't. (But I believe he's kidding somebody, maybe himself.)

He believes saucerians come from different planets, that they are mostly good, or friendly. There are also some unfriendly ones surveying us from space, but they are on the other hand observed by other planterians who are watching us, so it is a merry political cycle.

He definitely believes in astro ? Going out of one's own body and being able to observe oneself. It happened in a dream he once had at Giant Rock when he was sleeping in his station wagon. On talking it over with Van Tassel, and making it clear he didn't go anywhere, just wasn't in his body in that he could view his body from the outside, Van suggested that was saucerian trying to see if he could be a good contact and that it was definite a step to contact. He later had a few more of those experiences, and found his wife had one many years ago.

Feels there is tremendous things tied up with religion, but doesn't believe it is a thing to talk about in public meetings.

We discussed more on that point, and he said Van had mentioned it on TV, and I said yes, but he later had expressed the opinion

Description: In San Luis del Palmar, Corrientes Province, Argentina at 3:30 a.m. 42-year-old Ruben Meneses was driving a dump truck on a dirt road at 3:30 a.m when he had a close encounter with a brilliant object that approached his truck. The truck began to vibrate, and he felt a tingling sensation all over his body. He was unable to move as the truck was lifted up into the air and seemed to become transparent. Meneses then blacked out. He later awoke sitting confused in his truck at a location about 55 miles from where he had been, and did not remember how he got there. He was hospitalized in a state of confusion, shock, and disorientation. When he awoke he also had a vague memory of a humanoid encounter. Later under hypnotic regression he remembered being taken inside a room with mirror like walls, where he was made to lie down on a cot-like bed. He saw three short thin humanoids with dark gray skin, extremely long arms and thick wrinkles on their foreheads. The little beings communicated with Meneses using telepathy.

Custom Open Source Tools/Databases

The screenshot shows a GitHub repository page for 'ufo_data' by user 'richgel999'. The browser address bar shows 'github.com/richgel999/ufo_data'. The repository has a 'README' file and is licensed under 'Apache-2.0 license'. The main heading is 'UFO Event Timeline Processing Tool and UAP Event Dataset'. The description states that the tool processes data from various sources into a common JSON/Markdown format for AI training. It lists several dependencies with their respective licenses: ufojson (Apache 2.0), libsoldout (ISC), json (MIT), and utf8.h (unlicense.org). It also mentions that some code uses data from the 'uDb' project by Jérôme Beau. A section for 'Data files (in 'bin' directory)' notes that while the tool is open source, the data itself may have commercial restrictions.

github.com/richgel999/ufo_data

README Apache-2.0 license

UFO Event Timeline Processing Tool and UAP Event Dataset

To paraphrase [Charles Fort](#), this is [The Dataset of the Damned](#). The included C/C++ command line tool processes it from the original source formats to a common and simple data format (arrays of JSON objects+Markdown for rich text and URL's), making it usable by other applications and tools, or for AI training purposes.

Copyrights:

Code:

- [ufojson](#) tool: Copyright (c) 2023 By [Richard Geldreich, Jr.](#) (Apache 2.0 license)
- [libsoldout](#): Copyright (c) 2009, Natacha Porté (ISC license)
- [json](#): Copyright (c) 2013-2022 Niels Lohmann (MIT license)
- [utf8.h](#): Not copyrighted (unlicense.org)
- Some portions of the specific file udb_tables.h (such as get_hatch_geo, g_hatch_continents) use strings/tables from the "[uDb](#)" [project by Jérôme Beau](#).

Data files (in 'bin' directory):

Although the C++ tool itself is open source with a permissive license (Apache 2.0), **any commercial use of the copyrighted data in this repository (in any format, textual, JSON, Markdown, HTML, raw binary records, etc.) may require permission from one or more copyright holders:**

LUDER VALLEY

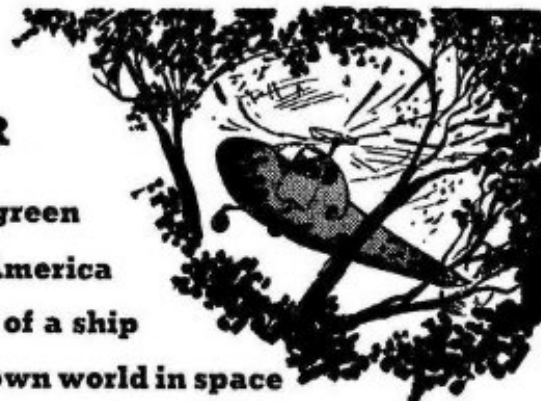

I heard the whir of propellers and looked up . . .

98

By
**RICHARD
S. SHAVER**

**There in the green
hell of South America
lay the wreck of a ship
from an unknown world in space**

THE chief's face was red, and the odor of cigar smoke, the kind that only grows in Havanna, drifted in gray ribbons across the room and in front of his red face. His big teeth were champing the butt, as usual . . .

"The name of the place is Luder, Steve—Luder Valley. It's the scene of the biggest gold strike in years—and it's in the worst jungle on the Southern continent. Even a condor carries a pack in that country—and skid chains. There is no way in except for a mountain goat or a monkey—so they use mules; they don't know any better than to go ahead, anyway. The snakes are bad, and you better take three kinds of serum along. Along with the gold occurs a good diamond clay, and lots of stones of good quality, for industrial uses. The Germans have sent in agents in a helicopter to buy those industrial diamonds and fly them out to a sub—the Germans are desperate for industrial diamonds. We've got to get in there and stop them. You're to be advance man. Get in, get the info, and make ready for the arrival of the rest of us. And don't get recognized for an agent before we get there—just smell out the lay of the land."

Pug, the chief's beautiful daughter, came in with a big bouquet of rainbow-hued flowers that smelled like heaven. Hell of a name for a girl, isn't it? But she had the cutest pug nose I ever saw on a human and someone had hung the name Pug on her and it stuck.

She was always coming in with something when I was around. But I wasn't having any. Pug was too much like her old man for a man to marry. I didn't take to the idea of being bossed around off duty, too. But that beautiful pug nose of hers, above a smile as gay and welcome as the Pearly Gates, if heaven is what they say it is—was hard to be rude to. So I said, "Good afternoon, Pug Ranscom."

She answered, "Good afternoon, Steve. Leaving so soon?"

"Yeah, I got my sailing orders—and my mule ticket, too. Don't you wish you were going along?"

"Maybe I will. Somebody will have to keep you out of trouble." Her eyes had a stubborn glint, and I knew she meant business, from the similar look her old man sometimes had when nothing would stop him.

"Now look here, Pug, you keep out of this. No more of that—I'll tell your
